Walden wood solutions

Your office should tell others a bit about how you work and who you are. Honest, intelligent and responsible with an attention to detail.

The contemporary styling of Walden™ is designed with you and your workstyle in mind. Thoughtful options, quality components and natural wood reflect your commitment to excellence.

One of the best warranties in the industry lets you enjoy the hardwood veneers, craftsmanship and performance of Walden throughout your career. And because it's environmentally friendly, you can feel good about making a choice that's good for you and the planet.

Love – We combine the desire to do what's right with tools that help us identify ways we can continuously improve our environmental performance. Our wood harvesting practices include working with managed forests, non-endangered woods and use of natural veneers versus composites.

Materials Chemistry – Analysis by MBDC allows us to understand the chemical makeup of our products and production processes, and their safety to human and environmental health. It flags materials to avoid in new products and eliminate from existing products. Our wood manufacturing uses water-based glues, stains and topcoats, resulting in negligible levels of VOC emissions and hazardous waste.

Lifecycle Assessment (LCA) – An LCA measures the environmental impact of a product's materials, production, transport, use, and end of life. LCAs help us identify ways to improve our environmental performance at every phase of a product's life.

Recycling & Reuse – Products are designed to facilitate disassembly and maximum recyclability. This includes the use of 100% recycled wood fiber content in particleboard and secondary uses for scrap in landscaping or as a fuel source. When a wood product reaches the final phase in its lifecycle, the Steelcase Environmental Partnership Program can connect you with resources to recycle or reuse that product.

Following this formula helps make all of our wood products environmentally responsible at every stage of manufacturing and use. Many Steelcase Wood products are Cradle to Cradle™ certified, see steelcase.com/environment for a complete list. This formula, combined with our LEED® certified plant — the first in the United States — helps show our love for both wood furniture and the environment.

Love how you work.™
