Green Story

Environmental impact and sustainability specifications of Brentano Green fabrics

---

PRODUCT: **Perspective - 3920**

CONTENTS: 65% Polyurethane, 23% Polyester, 7% Cotton, 3% Rayon, 2% Polypropylene

USAGE: Leather alternative, Upholstery, Panel, Eco-fabric

1. Our polyurethane is degradable.
2. Naturally soft and flexible, polyurethane does not require the solvents used to soften PVC or leather.
3. Polyurethane faux leather offers a greener alternative to vinyl (PVC). PVC contains chloride and is not degradable. It leaches toxic additives in landfills and emits carcinogenic dioxin when incinerated.
4. Polyurethane faux leather offers a greener alternative to leather. Leather production is a chemical-laden process, including the use of heavy metals.
5. General cleaning of polyurethane surfaces often requires only soap and water.
6. **Perspective** is manufactured in facilities that are conscientious of the green movement. A variety of policies are in place, such as air and water pollution decrement systems, as well as reduction and reuse of solvents.
7. **Perspective** is manufactured in an ISO 14001 certified facility. ISO 14001 creates an Environmental Management System (EMS) to identify and achieve environmental goals. *For more information, please visit www.iso.org*
8. All pigments and chemicals used in the facilities comply with EPA guidelines.
9. The quilting yarn dye used in **Perspective** complies with REACH standards.

Due to its soft and pliable nature, **Perspective** is classified in our “hand” category of eco-friendly faux leathers.
