

Features:

- Available with LED or halogen (MR11, MR16) lamps.¹
- Precision machined from aluminum or brass with all stainless steel hardware.
- Threaded cap allows for tool-less removal, simplifying maintenance in hard to reach locations.
- Cap holds up to two lens accessories.
- High temperature silicone wire pass-thru and cap O-ring are used to create a completely water tight fixture.
- CSA tested & certified to US & Canadian safety standards for use in wet locations.
