

Model MO3 - Machined Round Canopy

(see Model MO3 spec sheet)

Features:

- Precision machined to a blemish free architectural finish out of aluminum, brass, or stainless steel.
- Available in choice of threaded or non-threaded mounting hole.
- Designed for easy mounting to industry standard round junction boxes.
- Ø5" canopy, 3/8" thick.

Model MO15 - Machined Square Canopy

(see Model MO15 spec sheet)

Features:

- Precision machined to a blemish free architectural finish out of aluminum, brass, or stainless steel.
- Available in choice of threaded or non-threaded mounting hole.
- Designed for easy mounting to industry standard round junction boxes.
- 5" square canopy, 3/8" thick.

Model MO4 - Machined Rectangular Canopy

(see Model MO4 spec sheet)

Features:

- Precision machined to a blemish free architectural finish out of aluminum, brass, or stainless steel.
- Available in choice of threaded or non-threaded mounting hole.
- Designed for easy mounting to industry standard single gang junction boxes.
- 2 7/8" X 4 5/8" canopy, 1/4" thick.

Model MO6 - Cast Box Covers

(see Model MO6 spec sheet)

Features:

- Round and rectangular junction box covers fit industry standard J-boxes.
- Seamless, cast aluminum construction to prevent water entry.
- Rectangular cover fits industry standard single-gang outlet box.
- Outlet box covers come with single or double 1/2" NPS threaded mounting holes.

Note: Covers may be slightly different than pictured above.

Model MO5 - Cast Junction Box

(see Model MO5 spec sheet)

Features:

- Cast aluminum weather proof junction box.
- Available in industry standard rectangular single-gang box and round outlet box styles.
- Rugged, seamless, die cast construction prevents water entry.
- Reinforced connector outlets provide a secure mechanical installation.
- Closure plugs, ground screw, and mounting lugs included.

Note: Boxes may be slightly different than pictured above.

Model MO12 - Small Powered Canopy

12/120/230/277V, 75W Max.
(see Model MO12 spec sheet)

Features:

- Heavy walled cast bronze or aluminum canopy and base prevents deflection and 'sag' of mounted fixtures.
- 1/2" NPS threaded mount hole option with integral O-ring groove creates a secure and water tight mounting for fixtures.
- Captive cover screws and alignment pins provide for safe and simple cover installation.
- Stainless steel hardware requires single wrench for installation and adjustment.
- Electronic transformer option allows choice of 120V, 230V, or 277V input.
- Ø5 1/8" round canopy, projects 2 3/16" from wall.
- CSA certified for use in wet locations.

Model MO13 - Large Powered Canopy

12/120/277V, 150W Max.
(see Model MO13 spec sheet)

Features:

- Heavy walled cast bronze or aluminum canopy and base.
- 1/2" NPS threaded mount hole with integral O-ring groove creates a secure and water tight mounting for fixtures.
- Captive cover screws and alignment pins provide for safe and simple cover installation.
- All stainless steel hardware.
- 75W & 150W electronic transformer options.
- Ø7 1/4" round canopy, projects 3 3/4" from wall.
- CSA certified for use in wet locations.
