

CONSTRUCTION

- A** Housing - Made entirely of heavy gauge aluminium, composed of an extruded cylinder, welded to an extruded tube with a rectangular section and to a moulded plate. This plate mounts to the wall support.
- Wall support - Made of a galvanized steel plate of heavy gauge, in a hooked shape. This support is fixed to the wall using bolts.
- B** Lens frame - Made of moulded 356 aluminium alloy. Access to the lamp is made quickly via two screws. A high-strength gasket of silicone ensures sealing of the luminaire and prevents dust from infiltrating.

OPTICS

- C** Lens - Made of clear, micro-prismatic and heat resistant tempered glass.
- Without an optical system - Is available when PAR lamps are used.

ELECTRICAL COMPONENTS

- Incandescent socket - Made of porcelain, medium base and for an incandescent type lamp (lamp not included).

FINISH

- All surfaces are chemically treated against corrosion through a multi-stage immersion process. The polyester powder finish is applied by a thermostatic process offering an excellent protection conforming to ASTM G7, D-2247 and B-117/D-1654 standards. Standard colours are black, bronze and white with a textured finish. Consult SDL's "Colour Selection Guide" for others.

HARDWARE

- All exterior hardware is made of stainless steel.

WARRANTY

- This product has a three year warranty on the finish and against any manufacturing defect. The ballast and its components are covered by the manufacturer's warranty.
