

Crisunid Special

Special laminated glasses

Present-day technology in the laminating process enables various materials to be incorporated, combining safety and aesthetic properties in the product.

Cricursa currently offers a wide range of possibilities:

- metal meshes
- dry wood laminates
- synthetic fabrics
- marble, etc.

Cri-metal

Laminated glass with metal

Decorative aluminum and stainless steel architectural meshes laminated to glass panels provide a sophisticated and modern aesthetic. Cricursa CRIMETAL® melds the high visual quality of metals

with the security of laminated glass. Combined with specialty interlayers, CRIMETAL® can provide high performance characteristics including solar control and color. CRIMETAL® satisfies

the needs of the most prestigious architectural and interior design firms.

Applications

- Interiors and exteriors
- façades
- skylights
- canopies
- interior partitions
- flooring
- brise-soleils
- etc.

Glass type

To enhance the texture and the appearance of the chosen metal mesh, Cricursa always uses low iron glass. The use of materials of premium quality allow us to meet or exceed the high standards required and specified by our clients.

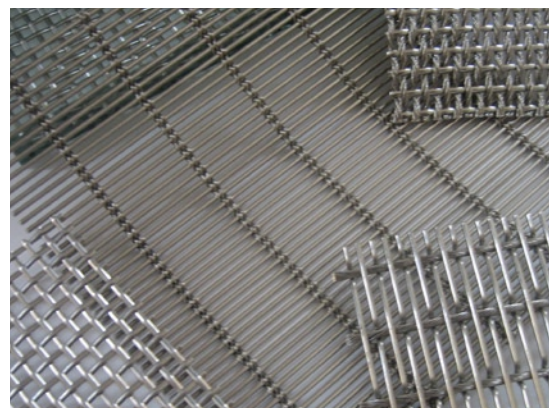

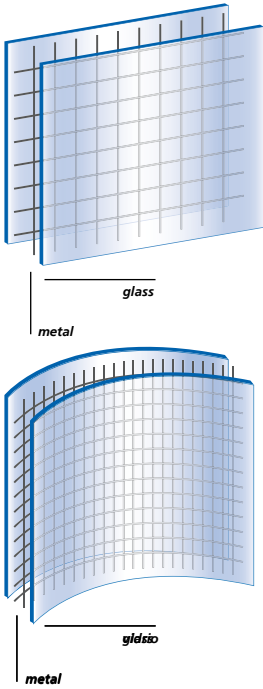

Technical properties

CRIMETAL® is normally manufactured using tempered glass, although annealed can be considered for certain applications. It can be provided either laminated or as double glazing.

Dimensions

2200x5800mm.

In case of exterior applications, the maximum dimensions will be given by Cricursa's technical department.

Laminated glass with marble

Cricursa's new laminated glass product, the process of bonding glass to a thin veneer of translucent marble, CRIMAR® is an elegant and exclusive product. It combines the high quality and novelty of natural stone with the

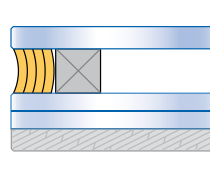

security of laminated glass. With its strength and beauty in both interior and exterior applications, CRIMAR® satisfies the needs of the most prestigious architectural and interior design firms worldwide.

Glass type

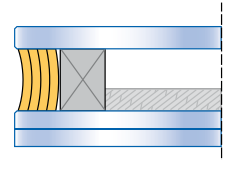

By utilizing low iron glass products, the beauty of the stone's natural colors are enhanced, achieving the precise level of quality required and specified by our clients.

Laminated

Insulated, marble outside

Insulated, marble inside air space

Applications

Interiors and exteriors in:

- façades
- skylights
- canopies
- interior partitions
- flooring
- brise-soleils
- etc.

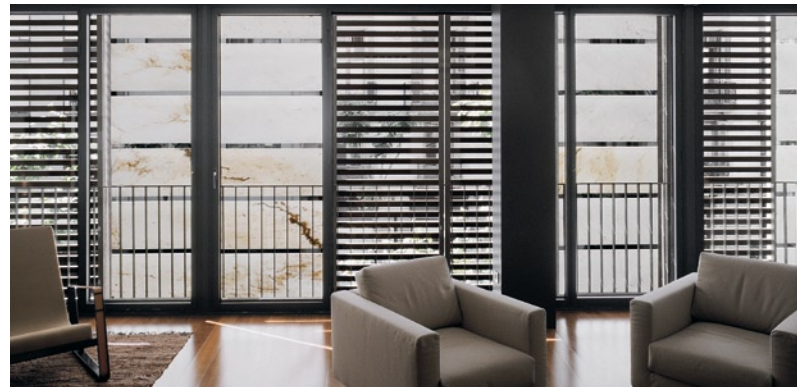

Technical properties

Technically, CRIMAR® is the foremost product of its kind on the market. Thanks to a patented lamination process that utilizes non organic interlayers to bond marble and glass, potential delaminations are avoided. Cricursa's resistance to ultraviolet rays do not contribute to any discoloring or yellowing, thus keeping the designed environment true to its original color.

CRIMAR® is always manufactured with annealed glass (tempered and heat strengthened cannot be used). It can be delivered either laminated or as a double glazing unit. Any desired marble can be used, subject to previous testing.
