

DECCA

INDEX

Decca introduces Index, a collection of wood casegoods, carefully curated to offer an unparalleled range of choices at Decca's unsurpassed level of quality. Index has been created to provide true choice where value is a consideration. Configurations of work and storage components are unlimited and include fixed and freestanding surfaces. A comprehensive casegood platform, Index is offered with six edge designs and six proprietary pulls, with access to Decca's vast veneer library. As one would expect, pulls are solid metal, edges are solid wood, and as evidenced by our hallmark wood grommet, no detail is overlooked. Decca invites designers and architects to consider Index on assignments where the desire for expression needs to be balanced with budget and value considerations.

Mitered and coped edges ensure continuity and alignment between work surfaces. These features are standard on all Decca casegoods.

Edge shapes in all Index products are formed from solid wood.

Wood veneers are finished to provide enduring surfaces for years of service.

The welcoming warmth of wood conveys a positive first impression in reception spaces.

Desktop storage elements afford a level of personalization and refinement.

The Knob Pull is rendered in stainless steel with a satin finish.

The Oval Edge alludes to tradition while maintaining a contemporary sensibility.

Storage Elements finished in optional Decca Pearl lacquer provide a progressive counterpoint to the natural beauty of wood veneers.

A strong linear aesthetic is conveyed by specifying the satin stainless steel Bar Pull.

Accommodation for personal effects is offered throughout the collection.

Traditional saddle stitching adds a distinctive accent to the mobile pedestals optional upholstered cushion.

Decca's proprietary solid metal hardware provides finished detail.

Solid wood edges, mitered and coped, establish a distinctive quality level.

Realized in optional Figured Walnut, Index connotes a quiet understated presence.

Visual austerity is achieved through Index's Wood Pull.

The Chamfered Edge in solid Walnut.
