

Product Specification

Design: 'Sprint'

Designer: Paul Brooks

Designed by the Senator in-house design and development team in conjunction with Paul Brooks and one of Senator's long standing suppliers. Senator has achieved great success with high performance task seating over the years, which has provided a wealth of experience and understanding of market needs and task chair functions.

Features

Designed for simplicity and ease of use with an understated style, 'Sprint' is a competitively priced, high performance, high comfort task chair featuring an advanced synchro mechanism, seat slide and back height adjustment with optional height adjustable arms, representing the very best integration of style, function and value added design.

The gas assisted injection moulded plastic 'J bar' is an example of the innovative use of inexpensive materials with structural integrity and reliability that enhance the value and performance of this design. Clear graphics and sensible location of the chairs' controls and levers, provide ease of adjustment. Easily accessible printed user instructions are neatly housed and displayed in the transparent plastic pocket at the top of the plastic backrest cover. A stylish 'logo button' carries the Senator logo in the centre of the upper backrest front.

The slim and elegant optional armrest has a soft armrest pad and height adjustment is operated by a trigger under the armrest. Width adjustment is achieved by pushing down the levers under the base of the arm and then adjusting the width by pushing the arm in or out from the seat to the desired width. The arms are secured by pulling the levers up again.

The full and shapely upholstery adds to the visual appeal of the design while providing an instant and excellent level of comfort combined with ergonomic integrity. A full range of ergonomic adjustments are provided in this chair, in accordance with the European norm, plus arm height adjustment. Through the clarity and simplicity of this chairs' functionality and performance, 'Sprint' exudes common sense with all that's required from an operator chair for today. This is a chair to rival any competitor at this level of the market where performance, design and value go hand in hand. In addition to this range is a visitor chair. Its cantilever frame and full and shapely upholstery adds to the visual appeal of this design whilst providing an instant and excellent level of comfort for all its uses.

Finishes

The injection moulded chair parts are all available in black as standard. The cast aluminium 5-star chair base can be polished or painted. Black castors are used with the polished Ali base, while black rimmed castors with a silver grey hub are provided with a black plastic base. Arm pads are dark grey as standard. Arm support stems are offered in either painted 'Regal' silver or polished chrome. Upholstery is available in the usual broad range of fabrics and leather.

Marketplace

Sprint is the ideal chair for the high volume mass market where value and performance are a necessity, but more complex chairs are not required. It will appeal to a host of potential users from call centres and high street retailers to banks and other similar corporate institutions. It is not a flashy design focussing on image, but is about performance with style.

Bullet Points
