

Maintenance

The Cool Pavers should be power washed once a year to help maintain the maximum amount of solar reflectivity.

The Cool Pavers will maintain a minimum of 50 percent reflectivity in a three-year period.

Wausau Tile guarantees the cool pavers meet Energy Star ratings

COOL PAVERS

Wausau Tile Cool Pavers

We always knew our pavers looked cool, now they feel cool! In an effort to be environmentally conscious, Wausau Tile is introducing a new line of architectural precast pavers with a finish that reflects the sun's energy. When installed properly on flat roofs, Cool Pavers by Wausau Tile will help reduce energy costs. Actual savings will vary based on geographical location and individual building characteristics.

Cool pavers have a minimum of 65 percent solar reflectance; therefore, absorb less heat than a standard ballast material on roof decks.

Transform a roof area into a usable, energy-efficient surface with Wausau Tile's Cool Pavers.
