Blue-Green

S202
Neutral

Printed images provide a preliminary color reference and should not be used for final color selection because they are only as accurate as modern printing technology permits. For the most accurate color representation, view in cool white U30 lighting. Avoid viewing in sunlight as finish colors will be misrepresented. Keep all paper and wood samples in a dark, climate-controlled environment. For samples, contact your PolyVision representative or call 1.800.620.POLY.

Finishes

Form + Function

Metal Frame Finishes

T010	Satin Anodized Aluminum
