H B F

As a complement to the original Horizons Office Collection designed by Wayne Braun, HBF now introduces this expansive collection of conferencing furniture re-imagined for today's changing workplace. The collection offers tables for formal, informal and reconfigurable teaming environments. The combination of simple form and enhanced flexibility allows for evolving needs and the increased presence of technology in the contemporary work environment.

Horizons Conference Series

01 | Horizons conferencing products offer maple or cherry wood tops complemented by wood column bases. This 10' elliptical conference table, finished in HBF 06 Amber Cherry on cherry, has the optional arch base molding detail on the wood column bases. It is equipped with power/data connections accessible through metal grommets located in the table top. Also shown are A/V and storage cabinets from the Horizons Office Collection.

Horizons boat-shaped conference table with wood column bases is finished in HBF 06 Amber Cherry on cherry. Horizons tables are available in five shapes and multiple sizes, with wood or metal bases, and with or without power/data connections.

02

03

A defining characteristic of Horizons conference tables is concealed power/data ports. This unit, utilized on tables with more than one wood base, offers four electrical outlets and three knockout slots to allow the field installation of a wide variety of data connections. The table is designed to offer complete field access to electrical and data connectors.

04 | The Horizons Office Collection features a complete system of conference tables and cabinetry to support formal meeting areas and team conferencing requirements. Units such as this mobile 48" round table, the mobile audio/video cart and the buffet/credenza facilitate group work environments through their small size and mobility.

05 | This concealed power/data unit is used on all Horizons table tops that require only one wood base. The unit features one slot for various data modules and four electrical outlets.

06 | Horizons conference tables with the wood and arched metal base are available with field interchangeable feet or metal casters.

07 The Horizons round power/data unit provides two electrical outlets and two field-changeable data connections. This round unit may be specified for a variety of tables with metal bases.

09 Horizons 8' rectangular conference table features the metal X-base. The table is equipped with two round power/data units to allow rapid user access.

08 Horizons metal X-bases and I-bases incorporate wire management channels with spring-loaded access doors. All metal X-bases and I-bases are available in HBI Satin Pewter finish.

12 | Horizons rectangular teaming tables may be moved and reconfigured into a variety of shapes. These two tables, placed back to back, offer easy access to floor connections through the wire notches on the back edge of the tables.

13 | This Horizons 48" diameter conference table, finished in HBF 02 Medium Walnut, is supported by an X-base with wire management channel. The round power/data unit provides two data connections and two electrical outlets.

14 | This teaming/training configuration is created with three rectangular tables which are ganged to two curved corner elements. Horizons round power/data unit is also available on teaming/training tables. Tables specified with round power/data units are standard with metal I-bases incorporating wire management channels.
