

THE LEGACY CONFERENCE SERIES

H B F

Designed by HBF's Kevin Stark, the Legacy Conference Series incorporates the traditional use of moldings and frets associated with Thomas Chippendale's works. The series, constructed of cherry veneers, offers a vast selection of conference solutions for today's office environment.

OI | This Legacy 8' conference table is standard with the thin panel base, round and square pedestal bases are also available. The optional Accordion carved molding inlay is shown in a contrasting finish.

O2 | Tables with pedestal bases may be equipped with optional electrical access doors in the table top and internal power/data connection bars. Access doors are standard in cherry veneer but may also be specified upholstered in any leather available from HBF Textiles.

03 | This 48" square conference table features the Parquet molding inlay; perfect for a small informal meeting area.

04 | Legacy Conference round and square tables are available with and without power data access.

05 | Capsule shaped tables feature round pedestal bases. Both round and square bases for tables specified with electrical access incorporate a hinged door for easy access to the inside of the base.

Illustrated are the five carved
 wood moldings and three veneer
 inlays which are optional inlays
 for Legacy products, these are
 available in any HBF standard
 finish. The photos are representa-
 tions of various finish
 combinations; many other
 combinations may be specified.
