

Project Profile | Education/Library

Client	University of Toronto, Mississauga
Product	Hybrid
Product Scope	200 Computer Workstations, 500 Study Carrels

fluidconcepts
think.design.create

Objective: Create workstations for a higher learning environment that are open, light and modern, but still providing the necessary privacy to promote effective studying.

Design scope: To provide a fresh, cost effective, design approach using durable, light emitting and warm/cool materials that fuse with the architectural environment . To also provide fully powered and data ready study carrels that are height adjustable and flexible in their configuration.
