simply  
soda

introducing soda

**sometimes the simple solution, is also the best solution**

**no gizmos or gadgets, your body weight**

**controls the backrest tension.**

Soda is a general use office chair that offers a self-adjusting synchronous seat and back tilt that automatically adjusts to the movements and weight of the user. The heavier the person the more resistance from the back rest, alternatively, the lighter the person the less resistance. No tension knobs required. Two yellow handles that act as intuitive guides for comfort adjustment activate pneumatic height adjustment and seat lock. Soda has been tested well beyond ANSI/BIFMA standards to ensure uninterrupted service.

**pure simplicity**

**pure comfort**

simple lumbar height adjustment

just peel and rotate.

and a very cool nesting chair too.

**with storage below**

**and ready to roll.**

The Soda side chair nests indefinitely to provide high-density storage with the arms and storage rack intact. Ideally suited to multiple use environments, cafeterias, training centers as well as high traffic general office applications. The nesting guides create a path for the chairs to be neatly aligned every six inches. The flip up seat provides easy access to the storage rack below and allows for nesting.

## great colours

Seven great seat and back colour options match and coordinate with the Viceversa® product line of mobile furniture. The seat can also be upholstered with any fabric from the Global Contract graded offering. Three frame colors include tungsten (shown) and black and charcoal. Yellow accent handles act as intuitive guides for comfort adjustment.

Clear back lumbar pad.

YLW - Yellow

RUS - Russet

PLT - Platinum

GRN - Green
