

# Height Adjustable Tables Features

The purchase of Height Adjustable tables is a sound financial decision with far reaching benefits. Designed as a freestanding module, Height Adjustable Tables will adapt to most of Global's workstation configurations. Twenty inches of vertical motion will not only comfortably support different users at one workstation, it will support different work tasks required by the individual user.

**Two quadrangle areas** for easy viewing of notebooks and reference material

**Optional keyboard tray** provides an additional ergonomic feature to reduce Repetitive Stress Injuries in the workplace

**Modesty shroud** for privacy

**Steel metal parts** ensure durability

**Counterbalance handle** features trouble-free calibration and accommodates surface loads to 90 pounds

**Adjustable glides** to accommodate uneven floor surfaces

**Finger tip control release lever** is cable activated and easy to operate

**Smooth glide telescoping leg** with infinite locking positions from 27" to 46" worksurface height

## Height Adjustable Tables

# General Office

The ability to change body posture throughout the workday keeps muscles flexing, the circulatory system working at its optimum flow and sustains the aerobic heart rate. The result? Work related stress is dissipated and body movement is maximized.

At Global, our ergonomic experts have designed the new Height Adjustable Tables to energize work performance.

The American National Standard for Human Factors has identified several features as key benefits to the health and productivity of office workers while operating a computer. Global's Height Adjustable Tables surpass these recommendations:

- Accommodation of both different users and multiple tasks is achieved by changing the height of the worksurface top.
- The ability to change postural positions from seated to standing continually revitalizes the body's circulatory system, encouraging maximum energy levels throughout the working day, reducing accumulated body stress.

- Computer monitor viewing angles are optimized by adjusting the worksurface, reducing eye glare.
- Height Adjustable Tables from Global pass ANSI/BIFMA standards for both knee and foot clearance.
- Easy to fit the existing work stations, Height Adjustable Tables quickly adapt to changing workplace needs with a full range of top shapes and sizes.
- Durability features include all metal moving parts and steel legs.

## Height Adjustable Tables

# Meeting

Height Adjustable Tables create excellent spaces to hold meetings and support teamwork functions. Often it's more appropriate to stand to examine documents or view a computer monitor.

## Height Adjustable Tables

# Telemarketing

The ability to change body posture can provide the worker with an active way to reduce stress and mental fatigue in passive work environments where constant attendance is necessary and long hours are dedicated to computer operation or communication functions.
