PLANK TABLE SERIES

Designed as a companion to the circular table series, the rectangular plank tables aim to minimize the essentials of a table to its simplest components.

The tabletop is beautifully crafted of solid wood planks. Extreme lightness is achieved by reducing the legs to three simple supports constructed of rectangular sections of solid brass. By linking the supports with a triangular frame for rigidity, the tabletop cantilevers freely creating the illusion of a floating surface.

The sculptural simplicity of the table's form and the placement of the supports away from the corners allow the table to function as a one-person desk or as a multi-purpose table for home or office.

Custom sizes available. The plank table series is suitable for both residential or contract use
