

ARCONAS®

exceptional public seating

bernù bench

Designer:
Davide Tonizzo

Design
Registered

Bernù bench is a highly designed public seating system designed for longevity, ease of installation and low maintenance.

Construction

- Die-cast aluminum construction ensures durability and low maintenance.
- Innovative peg system affixes platform seat to beam, allowing for quick installation and easy maintenance.
- Straight units available in 48" and 72" widths.
- Adjustable glides offer precision levelling and can be floor fastened upon request.

Finishes

- Cast aluminum components are satin with bright polished accents.
- Steel components are epoxy coated.

Bench Seat

- Solid wood slat design with airfoil profile.
- Available in maple, oak and walnut.
- Custom finishes are available upon request.

Applications

- Bernù bench is ideal for indoor applications for lobbies, waiting areas, lounges, courtyards in museums, art galleries, government, healthcare, commercial environments, airports and passenger terminals.
