Ordering C.O.M., C.O.L., and C.O.V. BONDUEL, GREEN BAY, LAVERNE, and TUPELO

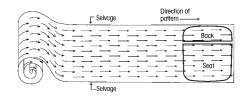

How to Specify C.O.M. Upholstery Textile designs often have intricate patterns.

Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

C.O.M., C.O.L. and C.O.V. Testing

KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

> 1330 Bellevue Street Green Bay, WI 54302 Attn: C.O.M. Specialist

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production

Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing For products shipped from Green Bay, WI facility, ship upholstery material to:

> Attn: C.O.M. Storage 1330 Bellevue Street Green Bay, WI 54302

For products shipped from Tupelo, MS facility ship material to:

> KI Tupelo Attn: C.O.M. Storage 2112 South Green Street Tupelo, MS 38801

For products shipped from Bonduel, WI facility, ship material to:

> Attn: C.O.M. Storage 204 West South Street Bonduel, WI 54107

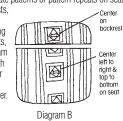

For products shipped from LaVerne, CA facility, ship material to:

> Impress/Kismet/Medical & Laboratory Stools Attn: C.O.M. Storage 2009 Wright Ave. LaVerne, CA 91750

Intricate Patterns

In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a

sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

Treated Materials

If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders

If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Ordering C.O.M., C.O.L., and C.O.V.

HIGH POINT

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M. AND C.O.L. SHIPMENTS MUST BE PREPAID TO:

KI

COM and COL must be identified as follows:

217 Feld Avenue High Point, NC 27263

Name and address

- 2. Your purchase order number
- 3. Our style number to which fabric is to be applied
- 4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER.

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered.
FABRIC WITH NAP: IF USING MOHAIR, VELVET OR ANY FABRIC WITH A "NAP", INCREASE YARDAGE REQUIRED BY 11%.
CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	7" - 13" REPEAT	14" - 21" REPEAT	22" - 27" REPEAT	OVER 27" REPEAT
54"	0	15%	20%	25%	30%	40%
51" - 53"	10%	25%	30%	35%	40%	50%
48" - 50"	15%	30%	35%	40%	45%	55%
45" - 47"	30%	45%	50%	55%	60%	70%
36" - 44"	50%	65%	70%	75%	80%	90%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

COM PRIOR APPROVAL DATA SHEET SELVAGE DIRECTION OF PATTERN ALL COM MUST BE APPROVED. Photocopy this form and submit with COM fabric for approval: (This fabric approval is for the purpose of advising how to apply COM TO BE USED your COM fabric, verify yardage required, and suitability.) ON THE FOLLOWING: RAILROADED SELVAGE YOUR COMPANY NAME/PHONE/FAX NUMBER: OTY PRODUCT NAME/NUMBER Material supplier: _ Material Name: _ Number: __ ADDITIONAL NOTES: Material Color: Width: · Orders cannot go into production without the information listed on this Vertical Repeat: _ ____ Horizontal Repeat: _ approval sheet. Attach memo sample to this approval sheet. If your order has been placed, list PO# Direction Stripe/Pattern is to be applied: (Check one) · The cost of the COM sample will be paid by the client. · Even after preliminary approval, KI reserves the right to reject COM/COL if ☐ Vertical ☐ Horizontal ☐ Factory Discretion necessary when the quality is not satisfactory for the product to be upholstered. KI assumes no responsibility for its overall appearance, flammability, durability, color fastness or any other quality after upholstered on a KI product.

Armrest

SPECIFICATIONS

Seat and Backrest

The seat is a contoured injection molded polypropylene inner structure covered with 1" thick polyurethane foam and fabric. The seat bottom is covered with an injection molded polypropylene shroud. The backrest features dual articulation, which is achieved by joining two independent backrest components to the front legs with four patented flex mechanisms. The flex mechanisms are constructed of a steel inner spine and flex spring encased in two machined brass housings with a ball joint. The backrest components are injection molded polypropylene. The upper backrest features an integral handle.

Frame Structure

The structure is made of four reinforced aluminum legs. The legs are 2.0mm wall extruded aluminum with die cast aluminum reinforcements at the joint locations. Models with casters have die cast aluminum feet. The legs on each side are held in place with two rein-

forced nylon joints. The two sets of legs are joined to an extruded aluminum cross member with six 5/16" screws.

Arms

Armrests are made of nylon and rotate upward 90° to allow the chairs to be stacked.

Available in black only.

Tablet Arm

The tablet is available in left- or right-handed versions. The tablet folds up and to the side, allowing the chair to stack or nest. Tablet is 10 x 10", large enough for a laptop computer. Offered with or without an arm on the nontablet side. When tablet is folded, there is an arm underneath the tablet which provides the option to convert from a tablet arm chair to a straight armchair. Only available in black plastic.

Frame Finish

Baked on electrostatically applied epoxy powder coating.

Poly Colors

The two backrest components and seat shroud are offered in black only. The arm caps, leg joints, glides and backrest trim are available in black only.

Casters

Dual 50mm wheel high impact nylon. Offered with all-nylon wheels for carpet and polyurethane covered nylon wheels for hard floors. Casters are always black.

Glides

The glides are injection molded polyethylene. Available in black only.

Dolly

Tubular steel frame crossed at center and welded. 3" swivel casters. Caster housings are welded to frame. Non-chipping enamel is electrostatically-applied, then baked-on, alkyd urea formula. Standard chair capacities permit passage through an 80" doorway.

NOTE: Chairs with casters should not be

stacked on the dolly.

Ganger

The left and right-side ganger elements are molded nylon. Provided with color matched attachment screws, they mount to the rear legs in place of the left and right leg covers. Armchairs do not gang. Available in black only.

Unupholstered chairs have a textured thermoplastic shell. Body contact areas have textured pattern. Upholstered chairs have fabric covered, extra thick, soft foam backrest and seat cushions fastened to an inner shell. Automatic mechanism governs backrest movement.

Oval Tube Frame

1-1/4" o.d., seam-welded oval tubular steel frame. Extension of rear legs forms arms. Arms and legs are oval seam-welded tubular steel welded to underseat structure. Electrostatically-applied powder-coated finish. Armrest caps in plastic.

Round Legs

3/4" o.d., seam-welded tubular.

Oval Leg Glides

Foot glides of molded high-impact plastic. Finish matches chair color with exception of chrome frame chairs, which have black glides.

Ganging Elements

Built-in couplers for ganging are optional. Monochromatic with frame color.

Tablet Arm Chair

Tablet arm chair stacks. Tablet arm of round tubular steel frame welded to leg and hinged at tablet. Tips up for entry and storage. Standard size tablet of resin core, with laminate writing surface and backing sheet. Round tablet edge with clear lacquer finish. Powder-coated frame. Seating clearance is 12-1/2". Tablet is 20-5/8" long and 12" wide.

Rookrack

Chairs are nonstacking with bookrack attached. Welded wire frame, powder-coated finish. May be field-installed.

Round Leg Glides

Self-leveling nylon base glides are replaceable. Finish matches chair color.

Ctooking

8 chairs

25" x 26" x 64"

See the above chart for stacking capabilities on a transport dolly. Do not exceed these capacities.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1 yard sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI Attn: C.O.M. Specialist 1330 Bellevue Street Green Bay, WI 54302

SPECIFICATIONS

Frame

Legs are 1" o.d. x 14-gauge tubular steel. Cross and side members are 7/8" o.d. x 14-gauge tubular steel. All joints are welded.

Armrests

Injection molded polypropylene.

Seat and Back

Injection molded polypropylene.

Upholstered Seat

Polyurethane foam is attached to the polypropylene seat.

Upholstered Back

Polyurethane faom is attached to the back liner, which is injection molded polypropylene. The liner is attached to the backrest using 8 nylon barbed rivets.

Glides

Black nylon with 11mm o.d. x 22 mm steel stem insert.

Frame Finishes

Black or silver powder-coated finish. The silver is unique to this chair.

SPECIFICATIONS

Seat and Backrest

Injection-molded polypropylene seat and back. Back features a contoured handle for easy lifting and stacking.

Chair Frame

7/16" solid steel rod in bright nickel-chrome or with electrostatically-applied epoxy.

Bright Chrome Finish

Surfaces are duplex nickel-chrome plated in a twenty-one step process.

Powder-Coated Finish

Electrostatically-applied epoxy, baked onto surface. Stacking powder-coated frames is not recommended.

Transport Dolly

Tubular and plate steel welded together. 5" casters: two fixed, two swivel. Powder-coated finish.

Tablet Arm

7/16" solid steel rod frame, hinged tablet for easy access. Standard size has resin core; high pressure laminate surface. Round tablet edge with clear lacquer finish. Bright chrome frame only. Chairs are nonstacking when attached, not available for use with powder coated frame chairs. Tablet flips up for easy access. Seating clearance is 14". Tablet is 20-1/2" long and 12" wide. Ganging with tablet is not recommended.

Seat and Back Pads

Fixed seat and back pads consist of a 3/16" thick plywood board with threaded inserts for attachment. The boards are covered in 1/2" foam padding and wrapped with fabric. The pads are attached to the seat and back with screws into the threaded fasteners.

Tablet Arm

SPECIFICATIONS

Plastic Seats, Backrests and Armcaps Injection-molded polypropylene.

Upholstery

"Upholstered Seat/Back, No Cushion" chairs have fabric wrapped around the entire exposed seat surface and on both the front and rear of the chair back. "Fixed Seat and/or Back Cushions" have padded fabric only on the seat and on the front of the back. Both the seat and front of the back have plastic exposed around the cushions.

Chair Frame

7/16" solid steel rod, bright duplex nickel chrome. Optional with electrostatically-applied epoxy (not recommended on tablet arm models).

Tablet Arm

7/16" solid steel rod frame, hinged tablet for easy access. Standard size has resin core; high-pressure laminate surface. Round tablet

edge with clear lacquer finish. Oversized has plywood core with clear lacquered edges. Black has black painted edges. Bright chrome frame only. Chairs are nonstacking when attached, not available for use with powdercoated frame chairs. Tablet flips up for easy access. Seating clearance is 14" for standard and oversized tablet arms. Standard tablet is 20-1/2" long and 12" wide. Oversized tablet is 20-1/2" long and 17" wide. Ganging with tablet is not recommended.

Tablet Arm on Upholstered Chair

It is recommended that the tablet arm not be removed after it is affixed to the chair.

Bright Chrome Finish

Surfaces are duplex nickel-chrome plated in a twenty-one step process.

Powder-Coated Finish

Electrostatically-applied epoxy, baked onto surface. Stacking and use of tablet arms on powder-coated frames not recommended.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. Upholstered chairs must be tested separately. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested. Customer's own vinyl and Kl's 2V cannot be used on the MXU Matrix® model (upholstered seat/back, no cushion) but can be used on fixed cushion models.

Test samples must be sent to:

KI

SPECIFICATIONS

Seat and Backrest

The seat is contoured injection molded polypropylene reinforced with glass fibers, and reinforced by two injection-molded glass filled nylon seat support members. The backrest is contoured injection molded polypropylene with an integral "handle". Both the seat and backrest have a textured finish, and optional upholstery pads. The upholstery pads are injection-molded polypropylene covered with urethane foam and fabric. The seat foam is 20mm thick, and the backrest foam is 15mm thick. The pads are attached to the seat and backrest with #10 color matched machine screws.

Frame

The structural frame is constructed primarily of 1", 13-gauge cold finished steel tubing, with 6mm (1/4") steel plates supporting 12mm (1/2") seat pivot pins. Two 10mm (3/8") traverse wires join the four leg tubes for added strength. Polypropylene covers fit over

the plates.

Armrests

Optional armrests are comprised of nylon armcaps attached to steel tubes that are integral to the frame.

Tablet Arm

The tablet is available in left-or right-hand versions. The tablet folds up, allowing the chair to be nested. The tablet is made of 15mm 11-ply birch plywood with a high-pressure laminate face. The effective working surface of the tablet is 11" deep by 14" wide.

Frame Finish

Baked-on electrically applied epoxy powder coating, or bright nickel-chrome plating.

Casters

60mm diameter dual wheel made of highimpact plastic. Carpet casters match frame finish if frame is black or warm grey. Other frame finishes have black casters. Hard floor casters are always black.

SPECIFICATIONS

Plastic Chair Seats and Backrests

Injection-molded polypropylene. Seat is onepiece screwed to frame. Backrest has two sections which form a snap-fit and are then screwed together. Chair seats have two dieformed 7-gauge straps welded to side frames.

Upholstery

Covers front of seat and backrest. Cushioned and upholstered models have 1/2" foam padding on seat and backrest. Upholstered models without cushions have upholstery fastened to shell. The back panel of the backrest is not upholstered.

Chair Frame

Armless version has 7/16" o.d. solid steel rod welded into a one-piece unit. Armchair version has 7/16" o.d. steel rod and 5/8" steel tubing welded into a one-piece unit. Seats have two die-formed 7-gauge straps welded to side frames. Bright duplex nickel-chrome plated or painted finish.

Back Articulation

Articulation is achieved with a single-piece frame which flexes as the back pivots around its upper and lower crossbars.

The seat is hung from the lower back so that the user's weight perfectly counterbalances the tilting pressure of the upper back.

Polypropylene Arm

Injection-molded polypropylene. Two-piece arm is joined by screws to encapsulate the frame. Arm is integral to frame.

Stacking Bumpers

An integral part of the frame, the bumpers are welded to the lower front frame radius. Two scuff protectors will be glued to the rear crossbrace of the Perry® chair to prevent scuffing of seat wires when chairs are stacked.

Bright Chrome Finish

Surfaces are duplex nickel-chrome plated in a twenty-two step process.

Tablet Arm

7/16" solid steel rod frame, hinged for easy access. Resin core tablet; high pressure laminate surface. Round tablet edge with clear lacquer finish. Bright chrome frame. Chairs are nonstacking with tablet arm. Not for use with powder-coated frames. Field-installable. Seating clearance is 16-1/4". Tablet is 20-5/8" long and 12" wide.

An oversized tablet arm is also available. Tablet is 20-1/2" long and 17" wide.

Powder-Coated Finish

Electrostatically-applied epoxy, baked onto surface. Tubular and plate steel welded together. 5" casters: two swivel, two fixed. Black powder-coated finish.

Ganging

Wire loop ganging devide. 5/16" steel rod is bent and welded to chair frame. Factoryinstalled only. Aavilable only on armless stack chairs with chrome frames.

Bookrack

Steel rod frame, bright chrome finish only. Chairs are nonstacking with bookrack; not for use with powder-coated frames. Shipped k.d. Field-installable.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. Upholstered only and cushioned/upholstered chairs must be tested separately. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested. Customer's own vinyl cannot be used on this product.

Four-Leg Carpet Glide

SPECIFICATIONS

Ganging

Seat and Backrest

Seats and backrests are molded compound curved polypropylene with a textured finish. Backrest edges have an integral channel into which upholstery is secured. Upholstered chairs have partially exposed polypropylene surfaces. Upholstery covers 1/2" foam on the backrest and 3/4" on the seat.

Molded plastic seat liner covers the seat underside, anchors the ganging devices, and has integral bumpers for stacking chairs. Seat liner matches the seat and back color. The back tilt is 15°

Lever Mechanism

Two hidden lever mechanisms which respond to user's weight, are located in the seat. Each has a double cam action. The rear can is tied to the back structure and is set in motion when the occupant leans back. This, in turn, through a spring linkage, activates the front cam at a slightly different ratio (1-1/2" to 1").

The mechanisms consist of stamped steel frame and levers, a steel spring and molded Delvin and nylon components. It is calibrated at the factory and needs no further adjustment.

Four-Leg Chair Frame

The frame consists of two "U"-shaped leg sections, one front and one rear. These are 1" o.d., 14-gauge seam-welded tubular steel. Seat straps are welded to the legs. Lever mechanisms are bolted to the seat straps, and, in turn, are attached to the backrest by the backrest supports. When specifying a glide for the Piretti Four-Leg Stack Chair, the glide will be monochromatic with the frame.

Sled Base Frame

Frames are one continuous segment of 5/8" o.d., 16-gauge seam-welded tubular steel. Seat straps are welded to the legs. Lever mechanisms are bolted to the seat straps, and, in turn, are attached to the backrest by backrest supports. Carpet, non-marring hard floor glides and stainless steel glides are optional.

Bookrack

Chairs are nonstacking with bookrack attached. Welded wire frame; powder-coated finish. May be field-installed; requires attaching with eight screws.

Leg Finishes

Baked-on electrostatically-applied epoxy powder coating, or bright nickel-chrome plating.

Tablet Arm

Plywood core tablet with high-pressure laminate surface. Tablet edge is painted black. Tablet arm support matches frame color. Seating clearance is 13-1/2" for standard and oversized tablets. Standard tablet is 19-1/2" long and 12-3/4" wide. Oversized tablet is 22-1/2" long and 15-3/4" wide.

Cantilevered Arm

1" o.d. tubular steel support is welded to frame underside at front. Steel support matches the frame color. Armcap is polypropylene and matches the frame color. When chrome frames are specified, cantilevered armrest is black. Armcap upright is not field-installable. Plastic armcap is fieldinstallable.

Fiberglass reinforced nylon; color permeates armrest. Hinge pin is welded to backrest support and bolted to underside of seat. Arm attachments are not field-installable. Plastic armcap is field-installable. Flex arm matches frame color. When chrome frames are specified, flex arm is black.

Sled Base Chair Steel Guide

Stainless steel. Fixed in position by mechanical fastener.

Transport Dolly

Tubular and plate steel welded together. 5" casters: two fixed, two swivel. Black powdercoated finish.

SPECIFICATIONS

Frame

Legs are 1" o.d. x 16-gauge tubular steel. Cross members are 1" o.d. x 14-gauge tubular steel. Side members are 7/8" o.d. x 14-gauge tubular steel. On the stools, the footring is 16gauge tubular steel. For both chairs and stools, all joints are welded. Wallsaver frame has an angled rear leg. Caster-based frame has a curved front leg.

Armrests

Injection molded nylon. Armrests are attached to the backrest without fasteners. Arms are assembled over the backrest attachment tubes of the frame when the backrest is installed. The backrest is then locked in place using a patented "turn and lock" feature.

Polypropylene Seat and Backrest

Injection-molded polypropylene

Upholstered Seat and Back

Molded urethane foam is attached to the seat

board, which is injection molded polypropylene. Slab urethane foam is attached to the back board, which is injection molded polypropylene. The boards are attached to the seat and back using four 10-24 x 3/8" truss head screws. Seat screws are not exposed. Backrest screws are exposed and are color matched to the polypropylene.

Chrome plated steel or plastic.

Casters

Carpet casters available in black finish only.

Frame Finishes

Baked-on electrostatically-applied epoxy powder coating, or bright nickel-chrome plating.

Tablet

Tablet measures 20-5/8 x 12"

Transport Dolly

Tubular steel frame, black powder-coated finish. Four 5" swivel wheels.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample for any upholstery model must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

Attn: C.O.M. Specialist 1330 Bellevue Street Green Bay, WI 54302

Designed by Giancarlo Piretti and manufactured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A.

SPECIFICATIONS

Chair Frame

Frame of 3/4" o.d. x 14-gauge tubular steel. Two leg frames are joined by means of "U"-shaped metal plates. Legs and side tubes are welded. Optional cast aluminum frame.

Stool Foot Ring

Footrest is 16mm solid steel rod wrapped around leg tubes and MIG welded top and bottom. Does not apply to cast aluminum frame.

Shell

One-piece, textured nylon with fiberglass reinforcement. Back of shell is ribbed to allow back flex.

Armrests

Nylon reinforced with fiberglass on tubular steel frame or cast aluminum on cast aluminum frame.

Tube Endcaps

Armless chair. Does not apply to cast alu-

minum frame.

Glides

Ball and socket joints to provide better leveling on any floor. Glides are available in black plastic or chromed steel. Ball and socket joint glides are not available on cast aluminum frame

Stacking Bumper

Plastic seat pan (black) for stacking support.

Frame Finishes

Baked-on electrostatically-applied epoxy powder coating, bright nickel-chrome plating, or cast aluminum.

Transport Dolly

Tubular steel frame, black powder-coat finish. Four 5" swivel wheels. Stacks 12 high.

Upholstered Seat

Seat is constructed of injection-molded polypropylene with 3/4" polyurethane foam cushion applied. Fastened to the shell with three screws through T-nuts embedded in

inner structure.

Upholstered Backrest

Back is constructed of injection-molded polypropylene with 3/8" polyurethane foam cushion applied. Fastened to the shell with three screws through T-nuts embedded in inner structure.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

SPECIFICATIONS

Frame

Legs are 7/8" o.d. x 13-gauge tubular steel. Cross members are 1" o.d. x 14-gauge tubular steel and 7/16" diameter solid steel. All joints are welded. Frames are available in 4-leg or sled base configurations.

Arms

Optional cantilever arms or loop arms are available. When equipped with arms, the supporting structure is a continuation of the rear leg finished to match the frame color. The arm caps are injection molded nylon matching the frame finish (chrome, hammertone, and starlight silver frames have black arm caps). The arm caps are attached to the steel structure by means of screws.

Seat and Shroud

Injection molded polypropylene.

Backrest

Injection molded polypropylene with integral

steel cantilever springs. The combination of the slotted polypropylene back and the spring steel provides a supportive flexing back. Springs are nominal 4.5mm diameter chrome silicon valve spring wire.

Optional Upholstered Seat

Molded urethane foam is attached to an injection molded polypropylene seat board, then upholstered using a draw-string process. The assembled seat pad is attached to the seat by means of hidden fasteners.

Glides

Upper and lower ends of leg tubes are capped with polypropylene end caps matching leg color (chrome frames and hammertone frames have black caps). Optional chrome plated steel glides adjust angle to bear squarely on floor. Optional non-skid glides for the sled base are co-extruded to provide a softer surface in contact with the floor.

Frame Finishes

Baked-on electrostatically-applied 45° gloss

epoxy powder coating or bright nickel-chrome plating.

Casters

Four-leg chairs may be ordered with carpet casters or hard floor casters instead of glides (does not apply to cafe stools). Casters are double-wheel, high-impact thermoplastic and are available in black only.

Tablet Arm

Tablet support loop is a continuation of the rear leg and may be ordered on the right or left side. A formed steel hinge is welded to the top of the support structure and secured with screws to the underside of the writing surface. Writing surface for standard tablet is 9–1/2" x 20–3/4" x 12–1/2" and oversize tablet is 15–1/2" x 22–1/2" x 14" plywood core of 5/8" thick, 11–ply hardwood surfaced with .030" high-pressure laminate top and plain backer undersurface. Edges are lacquered and sealed

Four-Leg Cafe Stools

Four-leg models on glides are available in 23-1/2" and 29-1/2" seat heights. Stool-height units are equipped with a reinforcing foot ring made of 7/8" diameter 13-gauge steel tubing.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to: KI Attn: C.O.M. Specialist 1330 Bellevue Street Green Bay, WI 54302

SPECIFICATIONS

Injection molded polypropylene.

Backrest

Injection molded polypropylene with integral steel cantilever springs. The combination of the slotted polypropylene back and the spring steel provides a supportive flexing back. Springs are nominal 4.5mm diameter chrome silicon valve spring wire. Top of back has an integral handle for ease of lifting and stacking.

Chair Frame

7/16" solid steel rod in bright nickel-chrome or with electrostatically-applied epoxy.

Bright Chrome Finish

Surfaces are duplex nickel-chrome plated in a twenty-one step process.

Powder-Coated Finish

Electrostatically-applied epoxy, baked onto surface.

Transport Dolly

Tubular and plate steel welded together. 5" casters: two fixed, two swivel. Powder-coated

Tablet Arm

7/16" solid steel rod frame, hinged tablet for easy access. Tablet is resin core; high pressure laminate surface. Round tablet edge with clear lacquer finish. Bright chrome frame only. Chairs are nonstacking when attached, not available for use with powder coated frame chairs. Tablet flips up for easy access. Ganging with tablet is not recommended..

Back Handle

Flip-Up Seat

SPECIFICATIONS

Arm

Seat and Backrest

Seat is two-piece construction of molded plywood upholstery board with a molded compound curved nylon shroud with a textured finish. Seat is always upholstered. Foam (1-3/4") is applied to the molded plywood upholstery board. Fabric is then upholstered over the foam. Backrest is available in either a polypropylene or upholstered version. Backrest is molded compound curved polypropylene with a textured finish. Backrest has an integral, molded "handle."

Back upholstery liner is molded polypropylene with glued on foam (1/2"). Fabric is upholstered over the foam. The liner is secured to the backrest by four #10 color-matched machine screws.

Seat flips up to allow chairs to nest for storage and transport.

Backrest Supports

Caster

Two welded steel backrest supports attach the backrest to the torsion mechanism.

Torsion® Mechanism

The back flex is achieved by the torsion mechanism. It consists of two flat torsion springs captured at both ends by steel bushings that are welded to the backrest supports. The torsion mechanism creates gradually increasing resistance over the full 12° of back flex.

Frame

The frame is made up of four legs welded to a steel mechanism tube. The legs are 1". 13gauge steel tubing. Reinforcement plates are welded between front and back legs for added strength. Nylon covers fit over the plates.

Arms

Armrests are made of nylon and match the seat and back poly color. Armrests rotate with the back.

Leg Finishes

Baked-on electrostatically-applied epoxy powder-coating or bright nickel-chrome plating.

60mm diameter double wheels of high-impact thermoplastic. High-impact plastic frame. Carpet casters match the frame color when frame is black, warm grey or chrome. For all other frame colors, casters match the poly seat and back colors (black or warm grey). Hard floor casters are always black.

Tablet/Tablet Arm

The tablet is made from black molded polyethylene. It is connected to the mechanism and supported by a 12-gauge steel plate. It has an effective working surface 12" deep by 22" across. The tablet arm is not field addable. The tablet arm is available in right-hand and left-hand versions. The tablet mechanism consists of aluminum die cast housings and through bolted pivots with bushings on two axis. The mechanism allows for horizontal rotation for ingress/egress without stowing the tablet. The mechanism stows the tablet so that the chair will nest with other Torsion® on the Go!® chairs with tablets and Torsion® on the Go!® chairs without tablet or arms.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

Standard Flip-Up Tablet Arm

G-Tablet Arm (Down) (only on frames "TS" and "TL")

G-Tablet Arm (Up) (only on frames "TS" and "TL")

Cantilevered Arm

SPECIFICATIONS

Seat and Backrest

Seats and backrests are molded compound curved polypropylene with a textured finish. Seat is two-piece construction. Upholstered chairs have partially exposed polypropylene surfaces. Fabric is upholstered over 9/16" foam on the backrest and 5/16" foam on the seat.

Backrest Supports

Two die-cast aluminum backrest supports attach the backrest to the Torsion® mechanism. A steel tube is cast into each backrest support for added strength.

Torsion® Mechanism

The back flex is achieved by the Torsion® mechanism. It consists of two flat torsion springs captured at both ends by steel bushings which in turn engage with the backrest spradually increasing resistance over the full 12° of back flex.

Full Sled Base Frame ("TS")

The sled base frame consists of two segments of 3/4", 16-gauge seam-welded tubular steel and two steel seat supports.

Cantilevered Sled Base Frame ("TC")

The cantilevered sled frame consists of one continuous segment of 1", 14-gauge seam-welded tubular steel with reinforced bends.

Four-Leg Frame ("TL")

The four-leg frame consists of two U-shaped sections, one front and one rear, welded together with two support brackets to form the four-leg chair. The sections are formed of 15/16", 15-gauge seam-welded tubular steel.

Cantilevered Arm ("TC", "TS", "TL" Chairs)

Fiberglass-reinforced nylon; color permeates armrest. Arms flex with the back. Not field-installable.

Lea Finishes

Baked-on electrostatically-applied epoxy pow-

der coating, or bright nickel-chrome plating.

Standard Flip-Up Tablet Arm

Plywood core tablet with high-pressure laminate surface. The edge is black laminate, otherwise clear lacquer. Tablet arm support matches frame color. Seating clearance is 13-1/2". Tablet is 19-1/2" long and 12-3/4" wide.

Fold-Down, G-Tablet Arm

Only available on frames "TS" and "TL". Tablet is constructed of plywood core with high-pressure laminate surface. Tablet arm support matches frame color. The tablet is 18" long and 13-3/4" wide. 4" of clearance is needed behind chair to allow table to fold away. Nonstacking.

Transport Dollies

Tubular and plate steel-welded together. 5" casters: two fixed, two swivel. Powder-coated finish.

INFORMATION

Kick Back Leg

SPECIFICATIONS

Frame

Legs of 7/8" o.d. x 13-gauge tubular steel. "Kick back" rear legs increase structural integrity and add to stability. Side members of 7/8" o.d. x 13-gauge tubular steel. Cross tube members of 7/8" o.d. x 14-gauge tubular steel. All joints are robotically welded.

Tube End Caps (Armless Chair)

Molded plastic. The end cap will match the frame color.

Floor Glides

Chrome plated steel.

Upholstered Seat

Inner seat is 3/8" thick polypropylene. Fastens to frame with four screws thru T-nuts embedded in seat. Polyfoam cushion 3/4" thick, glued to seat.

Upholstered Backrest

Two-piece construction. Inner back is 9-ply hard maple with 3/4" thick polyurethane foam. Outer back is a vacuum-formed polystyrene attached with six wood screws.

Frame Finishes

Baked-on electrostatically-applied epoxy powder coating, or bright nickel-chrome plating.

Transport Dolly

Tubular steel frame, black powder-coated finish. Four 5" swivel wheels.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

Attn: C.O.M. Specialist 1330 Bellevue Street Green Bay, WI 54302

Kick Back Leg

7

Upholstered Back

SPECIFICATIONS

Frame

Ganging

Legs of 1" o.d. x 16-gauge tubular steel. "Kick back" rear legs on four-leg model increases structural integrity and adds to stability. Side members of 1" o.d. x 14-gauge tubular steel. Cross tube members of 1" o.d. x 14-gauge tubular steel. Legs are joined to side members by brazing; all other joints are robotically welded.

Armrests

Molded nylon.

Standard Tube End Caps

Molded plastic. The end cap will match the frame color. Chrome frames have black end caps.

Four-Leg Chair Floor Glides

Chrome plated steel or plastic

Sled Base Non-Skid Glides

Black PVC material. Fixed in position by a screw. Field-installable.

Casters

Carpet casters available in black finish only.

Seat

Compound curved, 5-ply, 3/8" thick poplar hardwood. Fastens to frame with four screws thru T-nuts embedded in wood seat. 1-1/2" polyfoam cushion glued to seatboard.

Backrest

Two-piece construction. Compound curved, molded 9-ply hardwood plywood. Fastens to frame with four screws thru T-nuts in wood backrest. 1-1/2" polyfoam cushion glued to backrest. 1/4" thick padding. 3-ply, 3/16" thick poplar. Attached with 3 steel fasteners and 2 steel rivet fasteners.

Ganging Fixture

Only armchairs may be ganged. Welded steel rod. Armrest models have fixture screwed to underside of arms (shipped k.d.).

Frame Finishes

Baked-on electrostatically-applied epoxy pow-

der coating, or bright nickel-chrome plated.

Transport Dolly

Tubular steel frame, black powder-coated finish. Four 5" swivel wheels. Eight chairs stack on the dolly.

Stacking Vinyl Upholstered Chairs

It is recommended that chairs to be stacked be covered in material other than vinyl. KI does not warrant the effects of stacking on stock or C.O.M. vinyl upholstery.

Quantity/Height	4 chairs / 49"	4 chairs / 49"	4 chairs / 49"

SPECIFICATIONS

Frame

Legs of 1" o.d. x 16-gauge high-strength tubular steel. "Kick back" rear legs increases structural integrity and adds to stability. Side members and cross tube members will be of 1" o.d. x 14-gauge tubular steel. An 11gauge gusset will be located on the front legs to increase strength and rigidity. Legs are joined to side members by brazing; all other joints are manually welded.

Armrests

Molded nylon. Ganger will be fastened to the armrest and chrome finished. Only armchairs may be ganged. Armrests are monochromatic with frame. On chrome and hammertone frames, they will be black.

Tube End Caps (No-Arm Chair)

Molded plastic. The end cap will match the frame color. Chrome and hammertone frames have black end caps.

Floor Glides

Available in chrome-plated steel or monochromatic plastic. (Black plastic on chrome and hammertone frames.)

Upholstered Seat

Seat is a flat, 4-ply 1/2" thick, radiate pine plywood (AraucoPly or similar) fastened to the frame with four screws through T-nuts embedded in the seat. A 2-1/2" thick urethane foam cushion is glued to seatboard.

Upholstered Backrest

Two-piece construction. The front is constructed of a flat, 4-ply, 1/2" thick #3 gum veneer wood back fastened to frame with eight screws through T-nuts in wood backrest. A 2" urethane foam cushion applied to backrest. The back is constructed of 1/4" thick padding, 3-ply, 3/16" thick #3 gum veneer. Attached with eight steel fasteners and the backrest bracket.

Ganging Fixture

Only armchairs may be ganged. Welded steel

rod. Armrest models have fixture screwed to underside of arms (shipped k.d.).

Frame Finishes

30-sheen epoxy powder coating is electrostatically applied. The dry coating is then fused and cured in a baking oven to form a smooth, continuous film. Finish is chemical resistant. hard, touch and mar resistant. Bright chrome surfaces are duplex nickel chrome plated in a twenty-two step process.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 2 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to: Attn: C.O.M. Specialist

1330 Bellevue Street Green Bay, WI 54302

UPHOLSTERY INFORMATION

C.O.M. Fabric

For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can hold up the order. For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

SPECIAL FINISH MATCHES

KI can match special finish requests at an upcharge of \$58 List per item, up to 12 or a maximum charge of \$627 List per order per color. Special finish requests must be sent to a KI customer service representative.

Upon receipt from KI, the finishing department will prepare a "strike-off" which will be sent to

the customer for approval.

The approval form accompanying the strikeoff should be faxed to your KI customer service representative. Upon receipt of the signed approval form, KI will proceed with the order. Disapproved samples may be sent back to KI directly with an explanation of disapproval. A Special Finish Number (SFN) will be assigned to this finish sample for future reference or reorders.

INFORMATION

C.O.M. Requirements

C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M., and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements

Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq ft).

Contrasting Upholstery

When contrasting fabric is chosen, price at highest in-grade.

UPHOLSTERY INFORMATION

C.O.M. Fabric

For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can hold up the order. For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

SPECIAL FINISH MATCHES

KI can match special finish requests at an upcharge of \$58 List per item, up to 12 or a maximum charge of \$627 List per order per color. Special finish requests must be sent to a KI customer service representative.

Upon receipt from KI, the finishing department will prepare a "strike-off" which will be sent to

the customer for approval.

The approval form accompanying the strikeoff should be faxed to your KI customer service representative. Upon receipt of the signed approval form, KI will proceed with the order. Disapproved samples may be sent back to KI directly with an explanation of disapproval. A Special Finish Number (SFN) will be assigned to this finish sample for future reference or reorders.

For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

SPECIAL FINISH MATCHES

KI can match special finish requests at an upcharge of \$58 List per item, up to 12 or a maximum charge of \$627 List per order per color. Special finish requests must be sent to a KI customer service representative.

Upon receipt from KI, the finishing department will prepare a "strike-off" which will be sent to the customer for approval.

The approval form accompanying the strikeoff should be faxed to your KI customer service representative. Upon receipt of the signed approval form, KI will proceed with the order. Disapproved samples may be sent back to KI directly with an explanation of disapproval. A Special Finish Number (SFN) will be assigned to this finish sample for future reference or reorders.

INFORMATION

C.O.M. Requirements

C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M., and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements

Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq ft).

Contrasting Upholstery

When contrasting fabric is chosen, price at highest in-grade.

California TB133 Fire Safety Code The above seating products can be manufac-

The above seating products can be manufactured using the appropriate flame-retardant materials and fabric selection for compliance to California Technical Bulletin 133. Add

"FR" to end of model number and add upcharge. Please contact KI customer service for fabric compliance. Not available with moisture barrier. Gore or Nano-Tex treatments can be used when TB133 is required.

Construction

Frames are constructed of kiln-dried lumber and laminated hardwood plywood. Exposed wood components finished with catalyzed varnish (specify finish when ordering). Tight seats and backs sprung with stretch strap webbing stapled into position. Multiple densities of polyurethane foam covered with a layer of .75 super soft foam. Seats, backs and arms are field replaceable.

You make the rules. We make the rest.®

Of course KI solutions work better for you. They're made for you. No one pays more attention to customer needs than we do. We don't design our furniture to win awards (even though it does). We don't rely on one-size-fits-all solutions (even though they would make our life easier). We find out what you need. And, we make it. The same applies to our service, distribution channels...everything we do. It's all built around knowing what you want and giving you the choice. KI solutions work, because we're working for you.

KI 1330 Bellevue Street P.O. Box 8100 Green Bay, Wisconsin 54302-8100 1-800-424-2432 www.ki.com
