

Some straight talk about . . .

Intellect™ Classroom Furniture

It's a smart thing!

Intellect Classroom Furniture was developed, as the result of extensive research, to provide a learning tool appropriate to new and changing educational environments. It can help teachers teach better, students learn and retain more, and school facilities operate more efficiently, and

project an up-to-date appearance. Intellect is truly the next generation of classroom furniture.

Enhanced Comfort.

Comfortable students can learn more, and better retain what they have learned. Intellect desks and chairs were developed in collaboration with the acclaimed ergonomics firm, Metaphase. They are the first classroom products designed with correct ergonomic principles in mind, for the full size spectrum – child to adult. Seats and backs flex as the user moves eliminating pressure points thus improving comfort.

Easy Mobility & Stackability.

Weighing 20% less than conventional furniture, Intellect Classroom Furniture is light enough for even the smallest students to handle. A roomful of Intellect Classroom Furniture can quickly and quietly be rearranged to create flexible learning environments. Because it can stack, it takes less space to store.

Ultimate Durability.

The proof is in the warranty . . . an industry-leading 15 years! How do we do it? The use of high technology materials like tough ABS plastic (strong, yet lightweight), and heavy-duty elliptical shaped tubing.
