

Combining function and ease.

- Space-considerate Wallsaver option
- Beneficial Trendelenberg option
- Style continuity

**WORKING
FOR
YOU**

■ **Designed by Daniel Cramer.**

An optional arm cover offers additional padding and refinement.

The finger tip flush mounted release allows a smooth transition for 60/30 degree inclining on the wallsaver model.

Front and rear casters with push bar are standard on the Perth Recliner. Wood feet are optional.

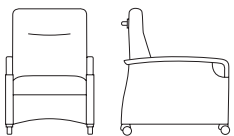

By using your foot on the left or right side, you can easily engage the Trendelenberg position.

Perth® Recliner

Today's recliner must aid in a patient's recovery. Perth Recliner is designed to do just that. It assists in the healing process by providing comfort, ease of use and attractive styling. Available as a wallsaver model or with an optional Trendelenberg mechanism. For design continuity, the Perth Recliner complements the entire Perth collection.

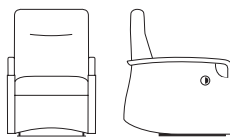

The Perth Recliner has a structural steel frame and solid beech hardwood arms for durability. A three position mechanism – 70/60/30 degrees – provides patient comfort. Casters provide easy mobility making the Perth Recliner a smart choice for any healthcare facility.

Specifications
