

Some straight talk about . . .

Trek™ Tables

Exciting leg profile. Contemporary edges. Affordable price.

Trek™ Tables offer a unique alternative to the multitude of “ho-hum” bases that are prevalent in the marketplace. Trek Tables provide a contemporary “take” on table design through their unique leg profile, new edge options, and dramatic glide design.

Pair Trek Tables with All Terrain to create a coherent design throughout a project.

Exciting Leg Profile.

The architectural feel of the Trek leg is a marked departure from typical “floor-hugging” bases. The leg is available in an “X”, “T”, or “TT” design to support any size or shaped top. Fixed leg, folding, and flip-top are standard. The Trek leg is available in any one of KI’s 30 powdercoats - including metallics and hammertones - plus chrome.

Contemporary Edges.

In addition to KI’s standard table edge offering, Trek Tables provide three new, contemporary edge profiles: Tread, Impulse, and Knife.

Affordable Price.

For the price of a “ho-hum” table design, you can have the Trek Table instead. Trek brings more “sizzle” to any table application, but doesn’t cost a lot more.
