

The Best Sub-Floor You Can Buy Just Got Better

Introducing Plytanium® DryPly™ Plywood with a water repellent coating

- 100% Builder Satisfaction Guarantee¹ against:
 - *Delamination*
 - *Edge swell*
 - *Joint sanding*
- 40% less water absorption for protection during normal construction cycles
- Special packaging to protect tongue and groove edges

Plus the added benefits of plywood

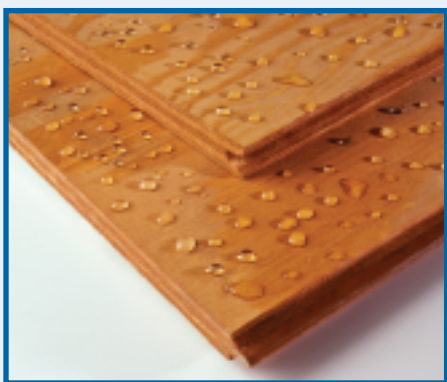

- Holds hardwood floors firmly—less squeaks
- No surface flaking, excellent adhesion when used under laminate flooring
- Superior stiffness decreases the probability of tile cracking
- Lifetime limited consumer (homeowner) warranty²

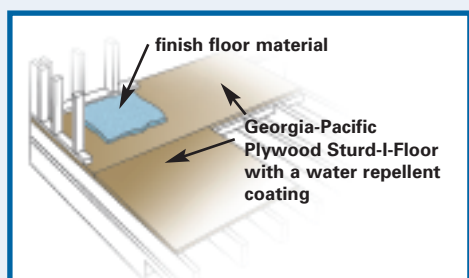

Plytanium® DryPly™ Plywood with a water repellent coating

Shield your sub-floors from exposure to moisture

Plytanium® DryPly™ Plywood with a water repellent coating shows up to 40% less water absorption than without the protective coating

77% of homeowners prefer the strength and durability of plywood

As a builder, one of the challenges you face day-in and day-out is protecting the sub-floor from the elements before roof and exterior walls are completed. Protecting the sub-floor from moisture related problems minimizes time-consuming sanding and callbacks, and improves the quality of the homes you build.

To help you meet this challenge, Georgia-Pacific offers new Plytanium® DryPly™ Plywood with a water repellent coating to provide weather protection during the normal exposed construction cycle.³

Plywood brings value to your homes

Today's homeowners are concerned about the quality of the home they buy. They want to know that the materials used are strong, durable and versatile. They want firm floors that won't pop, squeak and feel spongy underfoot. They prefer plywood sub-floors.

Plywood says quality to consumers. That makes it a strong selling point for your homes. At Georgia-Pacific, we want to make your sales job easier. That's why we provide the support you need to:

- Get across the clear benefits of plywood to prospects
- Enhance buyers confidence in the quality of your construction
- Differentiate your homes from homes built without plywood
- Help sell your homes faster
