The four styles, nine colors, and multiple textures in the Illuminescence Glass Series offer thousands of design options. And when you choose to combine these unique tiles with Porcelain Stone® by Crossville® or Crossville's other Accent Innovations products, the possibilities are endless.

Prism Glass, a 3 x 3 textured tile, is the cornerstone of this series. To complement Prism Glass, the line features **Prism Glass Listellos** - elegant glass liners in five different designs that evoke all the elusive magical qualities of water. Used as borders and accents, they provide infinite design possibilities.

Radiance Glass, available in 3 x 3, 3 x 6 and 6 x 6, is thicker and textured on both sides, and can be used on floors and walls. These tiles brilliantly emulate the elusive quality of light dancing on water.

Water Crystal Mosaics, one inch square jewels, blend the qualities of water, light and glass to create the magic that is Illuminescence.

Care and Maintenance

Regular cleaning is the best way to keep your molded glass tiles looking new for years to come. Use clean, hot water (combined with a non-abrasive household cleaner or more aggressive cleaning). Rinse thoroughly and dry with a soft cloth to prevent water spots. No waxes or sealers are needed. More information regarding the care and maintenance of Crossville glass products is available at www.crossvilleinc.com.
