

CUT OFF SIDE TABLE #1010

Shown in blackened steel and walnut.

This table wears the process of milling wood on its sleeve. When dimensioning lumber, boards are chopped to size leaving rough and generally unusable scraps. We take these scraps, sand and finish the tops, and build a base to match. Base available in blackened steel. Sizes vary and are based on cut-offs on hand. Please call for availability.

Standard sizes

16" W X 14" L X 16" H

Standard finishes
