

### **New products and /or lines:**

Apavisa, known for its work in commercial building materials, takes the traditional look of stone and adds contemporary flair with NeoCountry. Available in colors grey, beige and white and in formats including a new hexagonal size, a 23.6" x 23.6" (natural finish) and 11.8" x 23.6" in natural and bocciardato finishes. This full body porcelain features high bending resistance (61 N/mm<sup>2</sup>), frost resistance, low water absorption, stain and chemical resistance. With this new collection Apavisa enlarges its range of products for outdoor use. The bocciardato finish has a high anti-slip capacity with an R11 (DIN 51130) and a Class 3 (UNE-ENV 12 633) ratings. This product is also suitable for use in wet interior spaces such as indoors pools and public baths.

NanoEclectic is a new offering from Apavisa's NanoTech Collection – a product with the technical and static advantages of porcelain tiles but with just 4.8 mm. nominal thickness. NanoEclectic takes the technical benefits of slim tile and applies it in fashionable flair. The collection includes four color groups: Copper, Black, White and Mojave and a variety of textures, finishes and formats.

### **New technology:**

Apavisa has been on the ground-breaking side of technology for years, updating its raised floor systems, steps, modularity, water jet systems and ventilated facades, as well as other technical reinforcements in many of their products.

### **Apavisa's approach to ceramic tile specifically for hospitality design specification and how important the hygienic factor is for these kinds of tile:**

Apavisa's environmental concern for cleanliness reaches far beyond fashion and image campaigns. Porcelain tile is chemically inert, making for a perfect headboard or any space that may be in contact with germs. Walls, floors and spaces are impervious, non-absorbent, washable and incorporates non-toxic materials. Floors are also slip-resistant, making it especially attractive for the hospitality sector.

### **Highlights:**

It is all about the products---high technical characteristics: single caliber, modularity, micro sealed, bending strength 61N/mm<sup>2</sup>, resistance to chemical products, frost resistance, temperature shock resistance, resistance to wear and tear, color resistance to light, resistance to staining (standard method UNE-EN-ISO).
