

Café™ tables are a space-conscious addition to a wide array of unpretentious applications. Each table is a round wood top mounted on a single-pedestal, spun-steel, weighted base with adjustable levelers. This unique base is one-piece welded construction, tapered in two distinct “steps,” yet smooth and seamless in appearance. Bases may be specified in polished brass, bronze, satin-finished chrome or smoked chrome. *Designed by Timothy deFiebre.*
