

FORAY™ CHAIR

Foray bridges the gap between existing task and executive seating with the first design to combine executive-class comfort and luxury with task-oriented performance. Foray features an organic take on the traditional architectural silhouette, softened by shapes that are fluid while preserving the classic character of the chair. Designed with Geiger's intimate knowledge of the executive office and based on the Herman Miller Harmonic™ tilt platform, Foray is available in two heights, three finishes and three arm styles. Created according to the Cradle to Cradle Design Protocol, Foray is composed of 49 percent recycled content and is up to 93 percent recyclable. *Designed by Eric Chan.*

WIDTH 27 1/4
DEPTH 27
HEIGHT 39 TO 43 1/2
SEAT HEIGHT 16 TO 20 1/2
ARM HEIGHT 23 5/8 TO 32 1/8
