

LEED information

Existing Building
MR • Credit 2.2 • 1-2 points
 Sustainable Purchasing – Furniture

By purchasing Kwalu products that are at least 50% materials harvested and processed or extracted and processed within 500 miles of the project or contain at least 10% postconsumer and/or 20% postindustrial material.

Existing Building
MR • Credit 3 • 1 point
 Sustainable Purchasing – Facility Alterations and Additions

Kwalu wall protection systems may be considered semi-permanent products that contribute to sustainable purchases of the project containing at least 10% postconsumer and/or 20% postindustrial material.

Existing Building
MR • Credit 8 • 1 point
 Solid Waste Management – Durable Goods

Durable Kwalu products have a longer lifespan than conventional furniture, and can be recycled or refurbished for continued use, thus contributing to reduction in solid waste.

Commercial Interiors and New Construction
MR • Credit 1.2 • 1-2 points
 Maintain Interior Non-structural Components

Kwalu products can outlive the shell of the building and because of our warranty, any furniture or wall protection could survive new development and be available for ongoing use.

Healthcare* GGHC • MR • Credit 7.1 • 1 point
 Resource Use: Design for Flexibility

Kwalu products can assist in increasing flexible space planning and ease of adaptive reuse over the life of the structure as components that are long-lasting, reusable, easily reconfigured for future use or adaptable to a variety of floorplans.

Commercial Interiors and New Construction
MR • Credit 4 • 1-2 points
 Recycled Content

Kwalu products utilize postindustrial recycled materials, contributing to a project's overall recycled content usage.

Commercial Interiors and New Construction
MR • Credit 5 • 1-2 points
 Regional Materials

Kwalu products can contribute to points if the project is located within 500 miles of Brownsville, TX.

Healthcare* GGHC • MR • Credit 7.2 • 1 point
 Resource Use: Design for Durability

Projects that conserve resources associated with the construction and management of buildings by designing for durability, flexibility and ease of future adaptation, can specify Kwalu products in maximizing life of constituent components and assemblies.

Healthcare* GGHC
EQ • Credit 4.1
1 point
 Low-Emitting Materials: Interior Adhesives & Sealants

Kwalu adhesives and sealants, particularly used in wall protection installation, omit no VOCs.

Commercial Interiors and New Construction
IEQ • Credit 4.1 • 1 point
 Low-Emitting Materials – Adhesives and Sealants

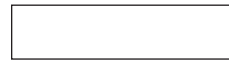

Kwalu adhesives and sealants, particularly used in wall protection installation, omit no VOCs.

Commercial Interiors and New Construction
ID • Credit 1 • 1-5 points
 Innovation in Design

Kwalu design team will collaborate on any project to create and tailor solutions that result in quantifiable environment and/or health benefits, utilizing best practice strategies, recycled content and smart design principles.

Healthcare* GGHC • IN • Credit 1 • 3 points
 Innovation in Design

Kwalu design team will collaborate on any project to create and tailor solutions that result in quantifiable environment and/or health benefits, utilizing best practice strategies, recycled content and smart design principles.

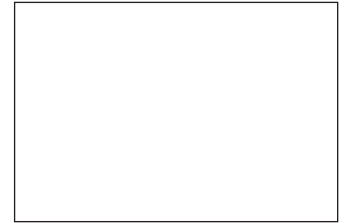

Healthcare* GGHC
EQ • Credit 4.2
1 point
 Low-Emitting Materials: Wall & Ceiling Finishes

Kwalu products are not coated or painted, so no VOCs are released.

Commercial Interiors and New Construction
IEQ • Credit 4.2 • 1 point
 Low-Emitting Materials – Paints and Coatings

Kwalu products are not coated or painted, so no VOCs are released.

Healthcare* GGHC • FM • Credit 6 • 1 point
 IAQ Management: Maintaining Indoor Air Quality

Kwalu products can assist in maintaining indoor air quality and thereby contribute to air quality management program development.

Healthcare* GGHC • EP • Credit 3.1-3.5 • 1-5 points
 Toxic Chemical Reduction: Facility Maintenance Alterations & Additions

Kwalu products can contribute to promoting healthy building occupants, reducing disposal costs and liability, and improving health for employees through purchasing least toxic products.

Schools
MR • Credit 1.2 • 1 point
 Building Reuse – Maintain Interior Non-structural Elements

Kwalu products can outlive the shell of the building and because of our warranty, any furniture or wall protection could survive new development and be available for ongoing use.

Schools • IEQ • Credit 4.5 • 1 point
 Low-Emitting Materials – Systems Furniture and Seating

Kwalu's non-VOC-emitting products can contribute to this point.

Healthcare* GGHC • EP • Credit 1 • 1 point
 Solid Waste Prevention in Purchasing

Longevity of Kwalu products, ease of maintenance and reduced product packaging all contribute to diverting furniture from waste stream in upfront purchasing, through donations or refurbishment, as well as use of recyclable or able-to-be-reprocessed materials.

Schools • MR • Credit 5 • 1-2 points
 Regional Materials

Kwalu products can contribute to points if the project is located within 500 miles of Brownsville, TX.

Healthcare* GGHC • EP • Credit 3.6 • 1-2 points
 Toxic Chemical Reduction: Furniture & Medical Furnishings

Kwalu products do not contain toxic chemicals, materials, chemical solutions or treatments referred to in credit 3.6.

Schools • ID • Credit 1 • 1-5 points
 Innovation in Design

Kwalu design team will collaborate on any project to create and tailor solutions that result in quantifiable environment and/or health benefits, utilizing best practice strategies, recycled content and smart design principles.
