ThyssenKrupp

Improve tenant satisfaction at the push of a button.

Microban® antimicrobial product protection is now available from ThyssenKrupp Elevator.

We all want the cleanest building environment possible. And, ThyssenKrupp Elevator can help. When you purchase ThyssenKrupp Elevator polycarbonate pushbuttons with Microban, you are getting antimicrobial protection that resists the growth of odor and stain causing bacteria. So microbes can't multiply and spread to your elevator's critical touch points.

Microban is a registered trademark of Microban Products Company.

microban

> product protection

Microban protection for all applications.

> new installations

These days, consumers are looking for products with built-in Microban protection. Choose ThyssenKrupp Elevator polycarbonate buttons with Microban for all of your new construction projects.

> modernizations

Time to upgrade your signal fixtures? Go with the only fixtures that include Microban antimicrobial technology and elevate your building status.

> repairs

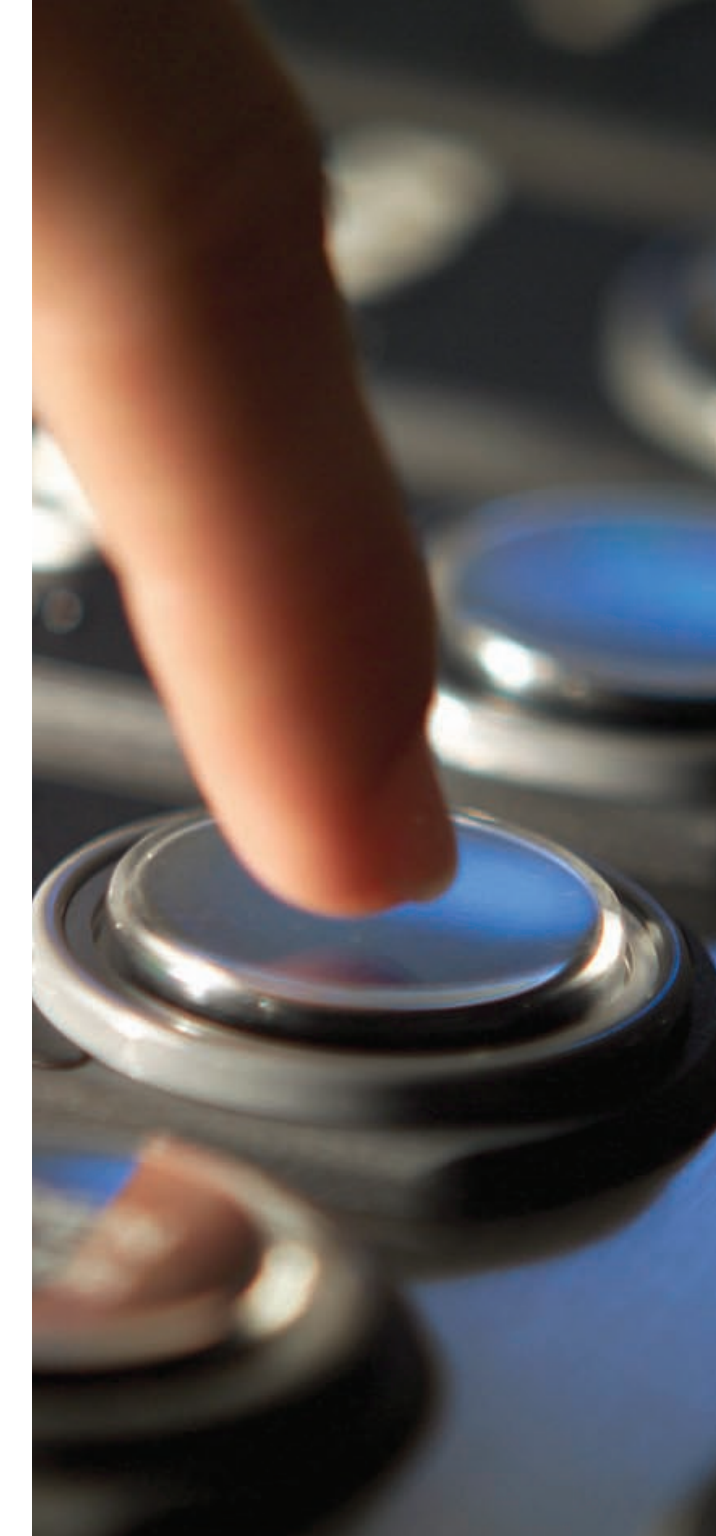

Let our technicians replace your broken or worn out buttons with new ThyssenKrupp Elevator polycarbonate button caps manufactured with Microban antimicrobial protection. It's a cost-effective way to upgrade when repairs are needed.

Prevent unnecessary damage.

To avoid unnecessary contact with microbes, many people will use almost anything besides their fingers to push elevator buttons – umbrellas, notebooks, elbows and canes. This can damage buttons and result in costly repairs. Microban antimicrobial protection will help get people's index fingers working again!

Give your elevators that special touch.

Contact your local ThyssenKrupp Elevator sales representative or visit us at www.thyssenkruppelevator.com to learn more about Microban antimicrobial protection.

microban

> product protection

When a microbe comes in contact with our pushbuttons, Microban protection penetrates the cell wall of the microorganism and disrupts cell functions, making the microorganism unable to function, grow and reproduce. This technology has been proven in more than 27 independent laboratories to be highly effective at controlling microbe growth. What's more, the protection is built in during the manufacturing process, so it can't wear away.

The only elevator fixtures to feature Microban protection.

That's peace of mind for riders. It's also one more value-added feature of your building, one more way you are demonstrating your commitment to providing the very finest environment in which to live and work.

Lifetime Guarantee.

Antimicrobial protection is big news you'll want to share with everyone who uses your elevators. When you choose ThyssenKrupp signal fixtures with Microban, you will receive special labeling for your elevators that will let riders know they can ride worry-free. And it includes a Lifetime Guarantee on every button cap, so you can be worry-free. Should a cap fail for any reason, ThyssenKrupp will replace it free of charge. The Microban Lifetime Guarantee remains in effect throughout the entire ThyssenKrupp Elevator maintenance period.
