

PLICO

PRODUCT DESCRIPTION

USER-FRIENDLY FUNCTIONALITY

Plico is a progressive table concept that supports the dynamic corporate culture of the 21st Century. Plico has a simple, densely stackable design which is compatible with other furniture styles in a modern architectural milieu. Plico meets the needs of the future for flexible, multi-functional, and space-saving furniture that is beautiful all while being flexible. Plico is engineered to be an aesthetically beautiful solution for optimising space interiors.

ENVIRONMENTAL AMBITIONS AND HEALTHY DECISIONS

Taking a genuine interest in our surroundings is far more than just a noble idea. It is deeply ingrained in HOWE's strategic thinking. Our long-lasting, space-optimising and multi-usage furniture solutions means fewer resources needed; and thus fewer effects on the environment. Thus, our strategic thinking also contributes to the overall LEED-credit.

We have summarised this mind-set in the concept 'GREENTHINKING' which constantly reminds us to act responsibly vis-à-vis our surroundings, be it our business partners or the natural world.

FEATURES

SUPPLIERS

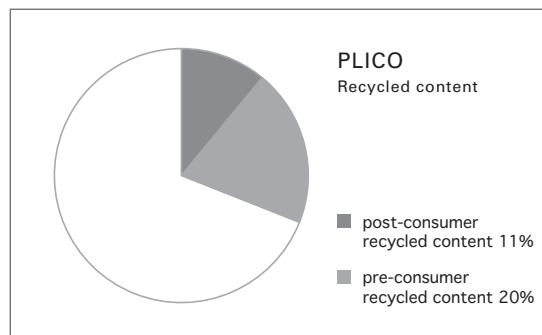

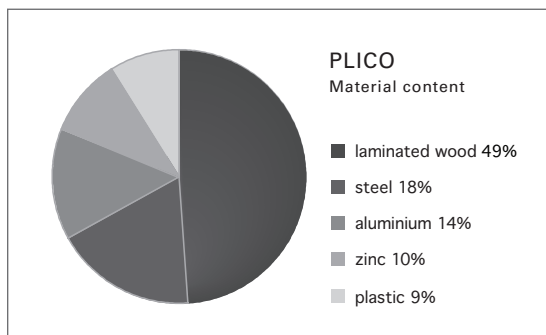

HOWE works closely together with our suppliers to continuously reduce our products' impact on the environment. HOWE is thus setting high environmental demands for both HOWE and our suppliers to comply with.

VOC

Plico laminated table top emits less than 0.04 mg/m³ formaldehyde which is 69% below the limit value of the E1 standard. What's more, the Plico laminated table top emits less than 5 µg/m³ compared to other Volatile Organic Compounds VOC, and therefore Plico ensures a healthy indoor air quality.

A SUSTAINABLE TABLE BASE

The Plico table base is 100% recyclable at the end of the product's life. The steel components used for the Plico base contain a minimum of 50% recycled content.

Plico is comprised of a minimum of 31% recycled materials. This breaks down to 11% post-consumer recycled content and 20% pre-consumer recycled content.

RECYCLABLE PACKAGING

The packaging materials used for Plico include 94% corrugated cardboard and 6% polyethylene plastic sheets. This means that the packaging is 100% recyclable. The cardboard used for packaging is produced from up to 25% recycled material and repeated recycling of the cardboard is possible.

Did you know...

- that Plico is 51% recyclable at the end of the product's life?
- that Plico contains no PVC, which goes for all HOWE products?
- that Plico is space-saving and thus resource saving both during transport and use?
- that Plico is a combination of timeless and durable design?
- that Plico is cost efficient and replacements of components are easily manageable?
- that Plico is easy to disassemble for recycling?
- that Plico has a 5 year warranty?
