SIMPLA

Simpla is a four-legged, lightweight table system with a 'lift off' top and a unique flat folding frame, folding within its own length. It is intended for use in training, meeting and conference environments. The separate top and frame elements make the setting up and storing away an easy process even for just one person, probably the trainer him or herself! The folded frame has a thickness of only 79 mm, and with the purpose designed trolley, 8 tables can be wheeled away for storing thereby saving valuable space. Simpla won a Best of NeoCon award in 2001.
