

TUTOR

PRODUCT DESCRIPTION

IN SYNC IN TERMS OF STYLE

As with all exceptional design, the Tutor table is poetically simple and plainly obvious. Developed as a table to accompany the famous 40/4 chair, Tutor echoes the chair's elegant and understated design language to create a visually incomparable table and chair concept. The Tutor table is an easy-to-manage, single-person stacking table which works equally as well on its own, due to its extremely durable materials. Not to mention its admirable stacking and handling capabilities.

ENVIRONMENTAL AMBITIONS AND HEALTHY DECISIONS

Taking a genuine interest in our surroundings is far more than just a noble idea. It is deeply ingrained in HOWE's strategic thinking. Our long-lasting, space-optimising and multi-usage furniture solutions means fewer resources needed; and thus fewer effects on the environment. Thus, our strategic thinking also contributes to the overall LEED-credit.

We have summarised this mind-set in the concept 'GREENTHINKING' which constantly reminds us to act responsibly vis-à-vis our surroundings, be it our business partners or the natural world.

FEATURES

SUPPLIERS

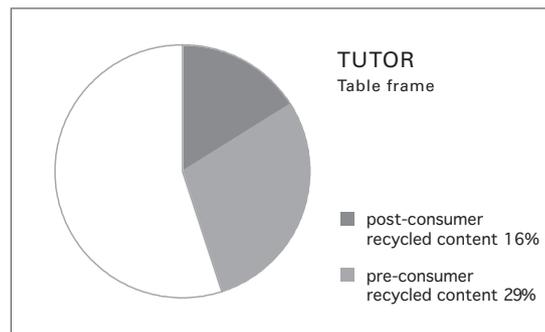

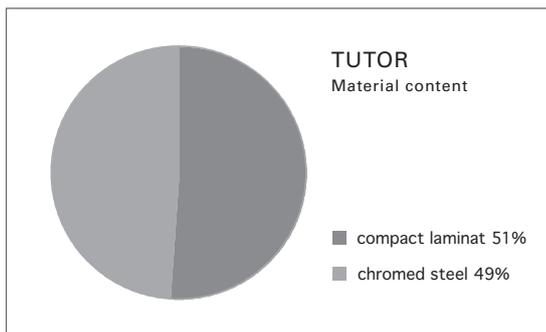

HOWE works closely together with our suppliers to continuously reduce our products' impact on the environment. HOWE is thus setting high environmental demands for both HOWE and our suppliers to comply with.

VOC

The Tutor table top is made of compact laminate which emits less than 0.04 mg/m³ formaldehyde which is 69% below the limit value of the E1 standard. What's more, the Tutor compact laminated top emits negligible other Volatile Organic Compounds (VOCs), and therefore Tutor ensures a healthy indoor air quality. Tutor contains no halogenated flame retardants or heavy metals.

A SUSTAINABLE FRAME

The Tutor Frame contains 45% recycled content and is 100% recyclable at the end of the product's life.

The Tutor frame recycled content breaks down to 16% post-consumer recycled content and 29% pre-consumer recycled content.

RECYCLABLE PACKAGING

The packaging materials used for Tutor include 95% corrugated cardboard and 5% polyethylene plastic sheets. This means that the packaging is 100% recyclable. The cardboard used for packaging is produced from up to 25% recycled materials and repeated recycling of the cardboard is possible.

Did you know...

- that Tutor is 49% recyclable at the end of the product's life?
- that Tutor contains no PVC, which goes for all HOWE products?
- that Tutor is space-saving and thus resource saving both during transport and use?
- that Tutor is a combination of timeless and durable design?
- that Tutor is cost efficient and replacements of components are easily manageable?
- that Tutor is easy to disassemble for recycling?
- that Tutor has a 5 year warranty?
