

# Lok-it™

The Ultimate Mobility Aid Securement System  
for Small and Medium-Size Buses

## Exclusively from American Seating

"American Seating's new small bus securement system is a smart investment; our drivers, passengers and maintenance team are happier and better served by having it."

**Lok-it**, by American Seating, safely secures passengers using mobility aids in shuttle and para-transit buses. This innovative system incorporates the **Dual Auto-Lok®** and the **Advance Restraint Module®** (A.R.M.®), providing the easiest, quickest and safest securement. **Lok-it**, a self-contained permanently mounted system, allows both hands to be free to secure the mobility aid, reducing physical demands on the driver. Passengers can be secured in less than half the time of conventional, floor-track systems.

### Features

- Time saver; passengers can be secured easier and quicker than floor-track systems
- Reduces physical demands on driver and personal injuries
- Lowers both operations and maintenance costs
- Permanently mounted system prevents loss or theft associated with loose or bagged belts
- Auto-tensioning and auto-locking retractors
- "S" hooks attach to mobility aids in seconds
- Superior vandal and corrosion resistance
- Heavy-duty construction for long life
- Modular system easily adapts to a variety of vehicle layouts
- All applications support 3-point occupant restraint lap and shoulder belts
- Eliminates maintenance and cleaning of track systems
- A.D.A compliant, safe and secure
- Dynamically tested to meet 30mph/20g Impact Test Criteria per SAE J2249

### Dual Auto-Lok

- Non-power maintenance-free system has no cables, wiring or components to adjust or replace
- Patent-pending system with built-in time delay mechanism allows free movement of belts for preset time and both hands to be free to secure the mobility aid, which minimizes awkward body movements and saves time
- Support legs are durable powder-coat painted carbon steel
- Compact modular design

### A.R.M.

- Patented and exclusive positive-locking safety feature provides the easiest, quickest and safest securement
- Telescoping design features integrated quick-release mechanism
- Adjustment knobs provide increased belt tension, if desired
- Telescoping model (shown) and a pivoting model type available for front tie-down applications
- Stores easily when not in use
