

INSTALLATION INSTRUCTIONS VITREOUS CHINA VANITY TOPS

ATTENTION INSTALLER: PLEASE LEAVE THESE INSTRUCTIONS WITH THE CONSUMER

Before Beginning: This vanity top accommodates a 4" center set lavatory faucet with remote control drain. To complete installation, you will also need hot and cold water supply lines, shut-off valves, drain connection, including a 1-1/4" lavatory trap and a good pipe compound for use on male pipe threads for all water connections. You may also

want to use sealant to secure the top of the vanity cabinet.

A word of Caution: The new Vanity Top is made of fine china like the best quality table ware. It is ruggedly constructed: however extra care should be exercised during installation when rough handling and the dangers of

dropped tools threaten to chip or crack it.

Water Supply: If your water line is through the wall, install an Angle Stop. If it is through the floor, install a Straight Stop.

Installing Vanity Tops

<p>1</p>  <p>a: Remove the vanity top from the carton and place on the vanity for a trial fit. Insure the vanity top is the proper size. Check to make sure there is ample room for the fittings, water supply and drain connections.</p> <p>b: It may be necessary to lower the back cross board on the vanity to prevent interference with installation. The cross board should be 5" down from the top of the vanity.</p>	<p>2</p>  <p>Mount the faucet and drain assembly in accordance with the instructions supplied with the faucet. The gaskets supplied with the faucet and drain should provide an adequate water seal.</p>	<p>3</p>  <p>Recommended, but optional - The weight of the vanity top with properly installed waterlines and drain trap should hold the vanity top firmly in place. However, you may want to place a bead of sealant (not supplied) around the edge of the vanity surface just before placing the vanity top in position permanently. Let the sealant set for 24 hours for firm, secure installation.</p> <p>4</p> <p>Now connect the water supply lines and drain lines to finish the installation.</p>

Care and Cleaning of Vitreous China

Your new vanity top is made of stain, acid and abrasion resistant vitreous china. But, like all fine finishes the china requires reasonable care. For day-to-day cleaning, wash with warm water, a soft cloth, and a mild detergent such as Handy Andy, Mr Clean or Lestoil. On stubborn stains, use one of the powdered detergents such as Spic & Span, on a damp sponge or scouring pad of nylon, saran, or polyethylene. Never use abrasive scouring powders, cleansers, or pads as they tend to create microgrooves that dull the finish and allow dirt to work into the surface. Use of cleaning products containing calcium hypo chlorite (chlorine) or any other reactive chemical shall constitute improper maintenance.

Limited Lifetime Warranty

Subject to the "Exclusions" set forth below, Crane Plumbing L.L.C. promises to the consumer to repair, or at the option of Crane Plumbing L.L.C., to replace any part of this plumbing product made from vitreous china which proves to be defective in workmanship or materials under normal use, and any other supplied part of this product under normal use for one year from the date of purchase. All costs of removal, transportation and reinstallation to obtain warranty service shall be paid by the consumer. During the warranty period for china and one year period for parts, Crane Plumbing L.L.C. will provide, subject to the "Exclusions" section set forth below, all parts free of charge, necessary to correct such defects if this plumbing product has been installed and maintained in accordance with written instructions furnished by Crane Plumbing L.L.C. with this plumbing product.
