

One Piece Barrier-Free Shower Module Cast Acrylic

FEATURES

- **A 6036.02G R/L**

The unit is molded with an integral seat and a shampoo/soap shelf located along the back wall. Shower modules shall be pre-drilled for a valve and a handheld shower head when factory supplies components. All units have an anti-skid floor treatment.

The unit shall be installed in a pit, $\frac{7}{8}$ " deep so that the finished floor will be level with the top of the threshold.

Unit must be set in a mortar base leveled and any clearances between the pit opening and the unit be filled with mortar. Shimming is necessary. It is recommended that a floor drain at or near the entrance to the shower be included.

The factory supplied components are to include two stainless steel horizontal grab bars, an integral seat, and a stainless steel curtain rod.

The unit is thermoformed from continuous cast acrylic sheet into a one piece seamless unit. The unit is reinforced with a composite matrix. The unit has a backside fire rating of "A" and a flame spread of 25.

NOTES

- Anti-skid floor treatment meets performance requirements of ASTM F-462-78.
- The basic shower conforms to ANSI Z124.2.
- Nominal Dimensions: Inside: 60" x 36"
 Outside: 68 $\frac{3}{4}$ " x 36 $\frac{1}{2}$ "
 Pit Roughing-In: 69 $\frac{1}{4}$ " x 37"
- Factory installed components are provided with additional back reinforcements to provide code complying structural integrity. In addition, these components are sealed from the backside.
