

**General:**

Precast terrazzo one piece products are made of black and white marble chips cast in grey portland cement to produce a compressive strength of not less than 3000 P.S.I., seven days after casting. The terrazzo surface is ground and polished with all air holes and/or pits grouted and the excess removed. Mop service basins are available in custom sizes.

TSB series 12" (305) high. Shoulders shall not be less than 2" (51) wide with 1/2" (13) pitch toward inside. The TSB 200 series is available with 12" plain curbs only.

The drain body in mop basins are made of stainless steel cast integrally and provide for a caulked lead connection not less than 1" (25) deep to a 3" (76) pipe.

**Installation:**

Establish 1/4" (6) clearance between mop service basin and building wall. It is required that the entire area between the mop service basin and the building floor has a 1/2" (13) layer of mortar in order that the mop service basin is level.

Optional stainless steel tiling flanges available.
