### Specifications

## Clip-On Series

- Panels:** Provide Simplex **Clip-on** system manufactured from 0.032" (0,81mm), 0.040" (1.0 mm), thick aluminum, galvanized steel, and stainless steel. Panel is downward demountable with a [butt joint, 1/8" (3mm) or 1/4" (6mm) reveal] and clip into a standard 15/16" T-bar grid. Panel dimensions will be as shown on drawings. Panels to be un-perforated or perforated with a un-perforated border, using pattern defined by the architect.
- Finish:** Select from Simplex Ceiling standards for panels. Custom colors available upon request.
- Suspension:** Suspension shall be 15/16" (24mm) T-bar with standard mains and cross tees.
- Perimeter:** Provide Box Mould with Hold down Clips as required in finish to match panels.
- Acoustical:** For perforated panels, provide a 0.008" (0.2mm) thick Simplex "T" non-woven acoustical textile to be bonded to the inside face of the panels. Can also be provided in 1-1/2" (38 mm) thick x 3/4 lb/cu.ft (12 kg/m<sup>3</sup>) density glass wool fiber completely sealed in an incombustible bag and installed with accordion pad spacers placed between the panel back and acoustical pad.
