CONFERENCE | BOARDROOM

Addressing the demands of today's technology requirements with subtle mastery, each conference table is available with a range of power and data configurations that enable users to plug in, power up and log on effortlessly. At the same time, coordinating conference accessory pieces — each with its own fine-tuned purposes for work sessions, formal presentations and everything in between — maintain design continuity throughout meeting spaces while providing an extended array of multi-functional solutions.

Make a statement and underscore a look with a carefully considered selection of base options. Each conference table is available in a range of base styles to suit its function as well as support virtually any design aesthetic. From full and half cylindrical to squared, traditional and arc paneled, each base reigns essential to defining the scale and sensibility of a selected table shape.

PRODUCT SPECIFICATIONS

Conference Collection:

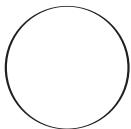

Conference tables manufactured in Maple, Oak, Cherry and Walnut wood species. All standard and custom veneer finishes available as well as laminate options. Seven standard top shape selections, twelve edge details and fourteen base styles offered. Bases available in all standard and custom veneer, laminate and metal finishes.

Conference Technology:

Eleven standard UL listed power/data units available. Access doors for through-the-surface technology options offered in varied finishes. Select models available with hardwire or daisy chain ganging option. Custom placement configurations available on most units. Base access doors featured on specified units.

Conference Accessories:

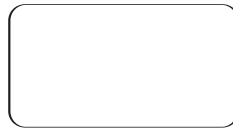

Conference accessories include media cabinet, credenza, buffet credenza, telephone stand, media board and serving/media cart. Available in all edge details as well as standard and custom veneer or laminate finishes. Featuring wood doors and Metallic Silver or Satin Black pulls, each is available in several sizes with distinct features and options.
