You can't beat family

Every Takeform product has a "look"...
an unmistakable family resemblance that
enables you to connect your space, by
uniting the elements within it.
It's all relative.

Fusion

SIGNAGE COLLECTIONS

Fusion is more than signage - it is an interior finish, connected to the space, relevant to the brand. Our choice of shapes and materials enables you to create signage within the context of the interior schematic or to step outside with an inspired new element. Extend your idea to signage - with Fusion, you can.

Ethos

LETTERS & LOGOS

The difference is the finishes. Ethos dimensional letters include the traditional solid aluminum, stainless, brass and bronze as well as laminates, veneers and acrylics. Timeless or trendy - your choice.

Purify

SANITIZER STATIONS

Your station can be configured for sanitizer, tissues, masks, gloves and gowns - choose a combination that suits you. Purify belongs in your space - and it will look it.

Nest

WALL ORGANIZERS

Nest can be used lots of ways, in lots of places. Use outside an office or classroom as a drop for mail or inner-office files. Or use for charts outside a patient or exam room. Or as a magazine organizer in your lounge or waiting areas.

Stance

FREE-STANDING SIGNAGE

Stance is a free-standing option that enables putting the information where you need it - where it will be seen. Use Stance as a building or floor directory, informational kiosk, directional pylon or promotional board.

Attend

PATIENT INFORMATION SIGNAGE

Used outside the patient room door, Attend alerts the clinician to infection risks, medication safety, fluid restrictions and other critical care information. Choose from 3 Attend models or combine and customize.

View

COMMUNICATION CENTERS

View message boards are the information center... a place to aggregate the important information. Use in or outside an office, classroom or nurses station. Or in a hospital room as a place for the care-giver to record key patient information.

Signify

EXTERIOR SIGNAGE

Exterior signage should mirror the architecture and materials of the surrounding structures. And with Signify, it will. Signify's 6 collections - each sharing a common shape enable this visual connection.. The finishes take it a step further... woods, stones metals, textures - colors and finishes that you don't expect in exterior signage.
