Assembly Instructions

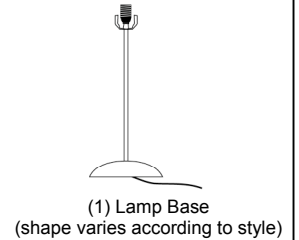

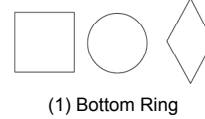

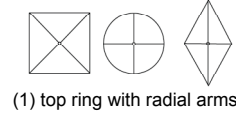

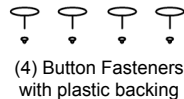

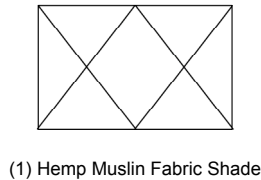

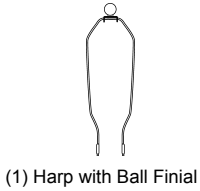

HARLEQUIN LAMP

Item 57, 58, 59

Designed by Elizabeth Meredith

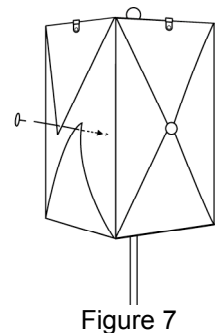

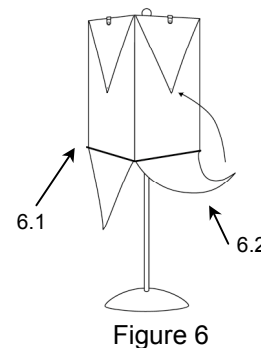

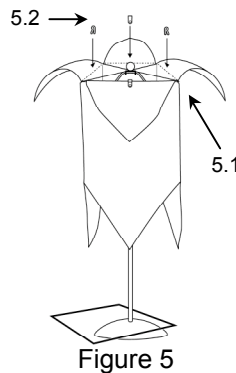

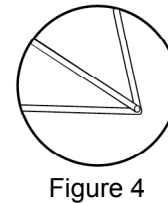

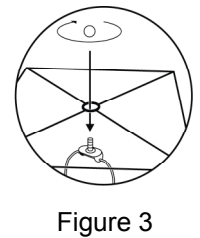

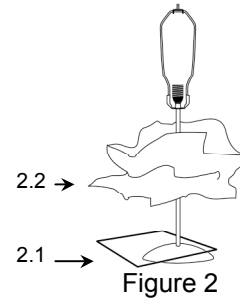

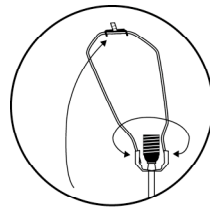

Parts Included: (pictures not to scale)

Assembly:

1. Remove the straight pins from the shade and then the shade from the cardboard.
2. **(figure 1)** Attach harp assembly by squeezing the prongs into the harp sleeves below the socket.
3. **(figure 2)** Place the bottom ring over the lamp stem and let it rest around the base **(2.1)**. Open the shade and drop it over the lamp so that the lamp stem passes through the center of the shade **(2.2)**.
4. **(figure 3)** Secure the top ring to the harp with the brass ball finial. The ring should be attached so that the radial arms sit above of the outer ring **(figure 4)**.
5. **(figure 5)** Now slip one of the triangular flaps of the shade over the top ring – from inside to outside **(5.1)**. Use the install clips to hold the shade in place **(5.2)**.
6. **(figure 6)** Bring the bottom ring up and around the lower part of the shade **(6.1)** and slip the lower flap around it, again from the inside to outside **(6.2)**.
7. **(figure 7)** Line up the black dots on the top and bottom flaps with the body of the shade and push the button fastener through the fabric at the dot. Then push the plastic pin backing onto the pin point inside the shade to secure the shade. Repeat this procedure for each of the flaps.
8. Remove the installation clips. Install bulb, turn on & enjoy.

You may put up to a maximum of a 100-watt bulb.

SAFETY AND CARE INFORMATION

SAFETY

We have designed your lamp to meet the highest UL and CUL safety standards.

This portable lamp has a polarized plug (one blade is wider than the other) as a feature to reduce electric shock. This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Never use with an extension cord unless plug can be fully inserted. Do not alter the plug.

CARE

Fabric shade . . .

This Shade is made from hemp muslin or dupioni silk and may be ironed with a cool iron and washed in cold water and allowed to air dry, or may be dry cleaned.
