Assembly Instructions

FLOOR LAMP BASE

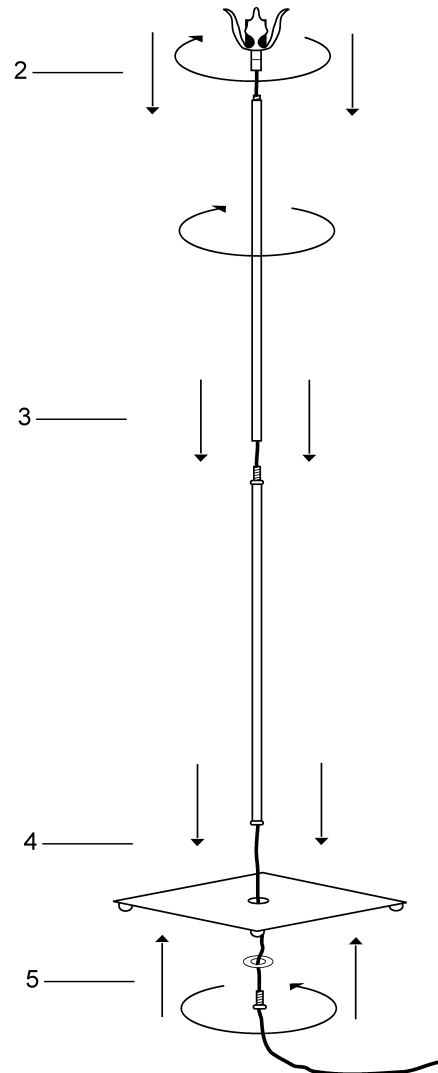

Tools Needed:

Wrench

Assembly:

1. The entire floor stand is chained linked together by the power cord. Please begin by lining up all the pieces in a straight line on the floor.
2. Screw the shade socket into the upper pole.
3. Screw the upper pole into the lower pole.
4. Place the assembled pole over the hole in the base plate.
5. From beneath the base plate, slide the washer and the hex head bolt up into the hole in the middle of the base. Gently start the brass hex – head bolt into the bottom of the pole, being careful not to cross thread the pieces.
6. Stand base up and proceed to separate instruction sheet for shade installation. Enjoy, and thanks for buying a Fire Farm Lamp!

SAFETY INFORMATION

SAFETY

We have designed your lamp to meet **UL and CUL** safety standards. This portable lamp has a polarized plug (one blade is wider than the other) as a feature to reduce electric shock. This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Never use with an extension cord unless plug can be fully inserted. Do not alter the plug.
