Assembly Instructions

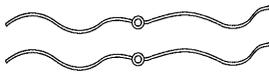

MAY POLE

Item 91-FS

Designed By Adam Jackson Pollock

Parts Included: (pictures not to scale)

(2) Base Legs

(2) Stem

(1) Arm

(1) Brass Finial

(2) O-ring

Assembly:

1. UNPLUG LAMP
2. **(figure 1)** Assemble the base. The legs should form an X and fit firmly together.
3. **(figure 2)** Thread the stem with the narrow brass ring onto the base. It is very important that you thread this stem on very tightly to ensure the Maypole is stable.
4. **(figure 2)** Thread the second stem piece onto the first. Make sure it is threaded tightly.
5. **(figure 2)** Does your stand look straight? If not, you can gently bend the stem straight while stepping on the base with your feet.
6. **(figure 3)** Remove the brass finial from the top of the stem. Roll the O-ring down along the stem to where you want the arm to rest. Slide the arm down the pole to the O-ring. You may adjust the height of the arm up or down by moving the O-ring. Finally, replace the brass finial on top of the stem.
7. You are now ready to hang your pendant from the Maypole. Hold the lamp at the desired height and wrap the cord along the arm and down along the stem. Feel free to experiment with how tightly you wrap the cord.

SAFETY INFORMATION

SAFETY

We have designed your lamp to meet the highest **UL** and **CUL** safety standards.

This portable lamp has a polarized plug (one blade is wider than the other) as a feature to reduce electric shock. This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Never use with an extension cord unless plug can be fully inserted. Do not alter the plug.
