MOBILE WORK-SURFACE

| pocket

WORK ON THE MOVE

Healthcare work seems to happen anywhere and everywhere.

Caregivers are mobile workers and the technology that supports them also needs to be in motion.

Whether communicating with a patient, collaborating with coworkers or performing personal focused work, Pocket™ moves the healthcare experience forward—in any environment.

SMART

Small footprint fits into the real world of healthcare. Only the essentials here. Zero noise (really), less effort to roll and a great set of wheels.

FLEXIBLE

Can accommodate a wide variety of technology: laptops, tablets, monitors, CPUs, all-in-ones, pen and paper.

USER-CENTRIC

Pocket's light storage and non-prescribed surfaces easily transform to the work process of the user.

CUSTOMIZABLE

Fixed or adjustable height options, CPU tech bay, and movable magnetic accessories allow the user to make the work space their own.
