MOBILE WORKSURFACE

# pocket

## WORK ON THE MOVE

Healthcare work happens anywhere and everywhere. Caregivers are mobile workers and the technology that supports them also needs to be in motion. Whether communicating with a patient, collaborating with coworkers or performing personal focused work, Pocket™ moves the healthcare experience forward—in any environment.

### HOW WE ROLL

Centered on research and observation, Pocket helps you keep up with the fast moving demands of healthcare environments. We're confident you'll see the value of Pocket for today's needs as well as those emerging. Steering toward simplicity, you'll be happy with what we've left behind—noise, complexity and visual clutter.

### SMART

Small footprint, designed for walking, fits into the real world of healthcare. Only the essentials here. A great set of wheels with zero noise (really!) and less effort to roll.

### FLEXIBLE

Can accommodate a wide variety of technology: laptops, tablets, monitors, CPUs, all-in-ones, pen and paper. Whatever you need to get the job done.

### USER-CENTRIC

You're the boss. Pocket's light storage and non-prescribed surfaces easily transform to the work process of the user.

### ADAPTABLE

Fixed or adjustable height options, CPU tech bay, and movable magnetic accessories allow the user to make the work space their own.
