

*Functional and environmentally friendly.
A product line with a green conscience.*

CASEGOODS

DESIGN INSPIRATION

Sustainability and environmental design are becoming increasingly important in the development of healthcare environments that truly support all aspects of healing. For the good of everyone today and future generations to come Nurture introduces the Viridian™ line of environmentally responsible casegoods. Viridian casegoods offer a unique combination of sustainability, functionality, and aesthetics for an environmentally conscious approach to storage in patient rooms. The contemporary product line features durable dressers, wardrobes, TV cabinets, beside tables, and overbed tables constructed of environmentally friendly materials.

ENVIRONMENT STORY

Designed with the environment in mind, Viridian casegoods are constructed of environmentally friendly materials – from the inside to the outside. Covered with a bonded melamine, the core is constructed of certified standard 100% pre-consumer recycled wood fiber particleboard. The cabinet tops, bases, sides and door fronts feature PVC free edge banding. The aluminum hardware, including drawer pulls, aluminum clad leg bases and “flying bridge” brackets, are all made from recycled aluminum.

FEATURES AND BENEFITS

CONTEMPORARY Rounded corners, a bow front curve on the cabinet top and base, and aesthetically pleasing lines gently guide the eye.

ACCOMMODATING Bold and ideally-shaped brushed aluminum cabinet pulls feature an asymmetrical design, allowing people with limited hand mobility to easily grasp pulls.

OPTIONS Edge banding of the tops, bases, cabinet sides and door fronts are available in three contrasting colors: grey, pebble and black.

MOBILITY Standard on bedside cabinets and 3-drawer dresser, non-marring single wheel casters allow both rotational and swivel locking. Aluminum clad leg base is standard on all other cabinets.

FLEXIBILITY Optional wing top on the bedside table and dresser cabinets provides additional surface area and adds unique styling with an aluminum “flying bridge” support bracket.

STATEMENT OF LINE

Refer to specification guide for complete product details and dimensions.
*Shown with optional wing top.
