CC-B-022 (Cover)

Round BETA SERIES™ column cover fifty feet tall in mirror stainless steel enhances a bold, multi-storied interior for a financial institution.

CC-G-031

GAMMA SERIES™ column cover in concave-fluted bronze is mirror finished to complement the marble walls in a Manhattan lobby.

CC-A-011

ALPHA SERIES™ column covers in a Manhattan automobile showroom have integrated spot lighting, a textured finish (applied in the field) and real ivy growing from a special planter base.

CC-B-021

Round BETA SERIES™ column covers in mirror stainless steel demonstrate the timeless beauty of the colonnade as a classic design element in a modern setting.

CC-G-11 031

Convex-fluted, bronze GAMMA SERIES™ column covers with a special base and capital and a patina finish enhance an elegant Manhattan lobby for a financial corporation.

CC-G-033

With tapered profile, GAMMA SERIES™ column covers in stainless steel work with the futuristic style of this dynamic airline terminal interior.

CC-X-041

Using advanced mathematics and non-deformational bending, this 21ST CENTURY SERIES™ painted steel column cover achieves complex curves in steel to enhance the most advanced design concepts.

CC-G-034

GAMMA SERIES™ column cover in brushed stainless steel has a complex shape and special capital and base to work with the other distinctive design elements in the lobby of a financial institution.

CC-B-023

Simple but powerful, square BETA SERIES™ column covers in satin stainless steel enhance Lever House, one of the first glass skyscrapers.

CC-A-012

Oval ALPHA SERIES™ column cover in painted metal works with the design and furnishings of an office interior. Black trim at the base protects from scuffs.

CC-B-024

Large diameter BETA SERIES™ column cover in satin stainless steel works powerfully with the bold geometric forms of an airline terminal interior.

Column Covers by MILGO/BUFKIN

MILGO/BUFKIN column covers are available in four series: CC-A, CC-B, CC-G, and CC-X and in a variety of metals and finishes.

CC-A

MILGO/BUFKIN's low-priced ALPHA SERIES™ column covers are formed in metal sections, primed and ready for finishing. At installation, seams get filled with wallboard compound and sanded smooth prior to painting.

ALPHA SERIES™ column covers can be supplied in any diameter over 3", any height, and various shapes including circles, ovals, ellipses, squares and rectangles.

CC-B

MILGO/BUFKIN's BETA SERIES™ column covers are factory finished and available in aluminum, bronze, titanium, steel, stainless steel, and composites, and with mirror polished, satin polished, photoetched, or sandblasted finishes, or with state-of-the-art coatings. Seams are typically furnished flush or with reveals.

BETA SERIES™ column covers are available in any diameter over 4", up to 20 foot lengths without horizontal joints (unlimited height with joints), and various shapes including circles, ovals, ellipses, squares, and rectangles.

CC-G

The GAMMA SERIES™ is MILGO/BUFKIN's top-of-the-line series of column covers, combining fine artisan craftsmanship with ultra-modern manufacturing techniques. GAMMA SERIES™ column covers expand upon the BETA SERIES™ line to include fluted surfaces, tapers, and free form shapes.

CC-X

MILGO/BUFKIN's 21ST CENTURY SERIES™ column covers use advanced mathematics and non-deformational bending to produce complex forms that enhance contemporary architectural designs.

MILGO/BUFKIN can accommodate all of your column cover needs. Whenever required, our engineers will work to help you specify and custom design the column covers you need. Contact us for detailed specifications sheets.

MILGO/BUFKIN column covers are pre-engineered for rapid installation in the field. They are supplied with internal support studs as required. We are specialists in fast turnaround. We ship everywhere in the world.

MILGO/BUFKIN is one of the foremost fabricators of custom architectural metalwork. Our state-of-the-art technology and old-world craftsmanship transform stainless steel, steel, aluminum, bronze, titanium and other metals in a variety of finishes into objects of beauty and utility.
