

Dr. White's Chest
DRW · 71"H x 21" D x 42"W

Named after the customer who first commissioned it over twenty years ago, the Dr. White's Chest has been built for many homes since. A combination of dovetail, miter, rabbet, lap and butt joints makes this the most demanding single piece of cabinetry we offer. With seven drawers and two cupboards with adjustable shelves (and a secret compartment for storing valuables), the Dr. White's can store a full wardrobe of clothes and sweaters.
