FEATURES

The G4-DI-4 presents a unique ultra shallow winged profile and is one variation of a complete family of suspended linear fluorescent luminaires. The G4-DI-4 is a direct/indirect version of the family of luminaires and provides exceptional performance. Constructed of perforated steel and aluminum extrusions, it features a "reveal" between modules in continuous rows. The computer designed optical system creates a widespread indirect distribution while offering a wide variety of direct perforated accent patterns along its wings creating its own unique styling contrast.

SPECIFICATIONS
