

seating and occasional tables

BIX™ defining spaces

METRO
a steelcase company

architectural scaled canvas

...architecturally scaled canvas...

The Bix experience can radically shift based on YOUR material specification.

(shown with Brayton Bob™ table)

application flexibility

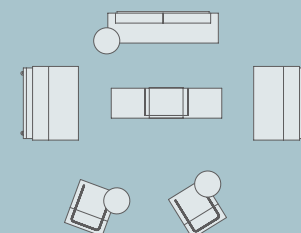

When eating and work sometimes intersect, the Bix **work booth** can be easily utilized in any cafe/dining setting.

(shown with Brayton Enea cafe table and chairs)

setting size: 27' x 18'

a destination with
no reservations required

Create **LIVINGrooms** that work as conference rooms. Bix **podium** converts any area into an immediate presentation space, which can be a valuable asset for presenters. The Bix **sled lounge** is ideal for small space and offers an optional tablet and upholstered arm. The Bix **bench** features a useful service tray on top and open storage below.

setting size: 16' x 14'

A modern lounge area with white armchairs, a side table, and a large purple partition wall. The room features large windows on the left, a white pendant light, and a polished floor. The purple partition wall is composed of several panels supported by metal legs.

movable space division

Bix...movable space division. Bix creates versatile space division and enclosure while keeping the overall feel of an open, social environment. The Bix **side table** offers a lightweight, portable work surface that stands at lounge height and can be easily placed close to lounge seating.

sympathetic
to architecture

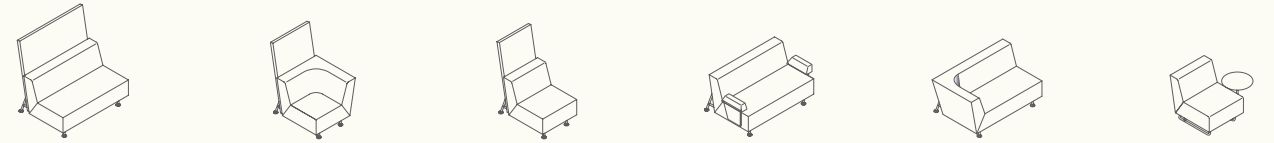

A system that supports a wide range of applications, Bix is furniture that is **sympathetic to architecture**.

(shown with Brayton Bob™ table)
