

FreeWall2

VECTA

Wernli Collection

Perfectly adaptable

Be it a single workstation or team area – FreeWall adapts perfectly to the user:

adjustable shelves with no need for tools, customized visual and acoustic privacy.

Space for organizational aids and technical equipment.

Additional storage space on 3rd level. Ideal conditions for work and space efficiency.

An unbeatable argument for installing FreeWall is its **cable management** facility with lots of room and useful features. Next argument: **connectivity**. Thanks to both of these, you no longer have to depend on building infrastructure. Placed behind or next to each other, standing alone or linked together, FreeWall lets you create ideal teamwork areas. At the same time, you save space through shared use of equipment.

Welcome

FreeWall in reception areas: an attractive opportunity for displaying information about your business or products. An elegant screen for waiting areas.

FreeWall Bench

FreeWall Bench is a comfortable stopover point for guests or employees just briefly passing through. There is always a free space here. The e-box and work top offer easy power and IT connectivity. A pleasant solution for users and a space-saving, cost-effective solution for you.

Flexibility for your work

FreeWall offers you flexibility. It accommodates your work materials and technical equipment. This makes your desk a free (and mobile) space for project work and discussions. You can easily alternate between individual and team work – while keeping all important things within arm's reach.

“customized” **FreeWall**

Never has it been simpler to fulfill individual needs and preferences than it is with FreeWall: a wide range of paneling offers visual and acoustic privacy to suit specific needs. This provides greater privacy and enhances concentration.

Translucent

Acoustic

Pleated Blind

Simple, tool-free shelf adjustment at 1.97-inch intervals. The ultimate in ergonomics! A real space and time saver. This combination of features results in work efficiency. And a wide range of colors and materials for the ultimate in wellbeing.

Exposed to view

Exposed to view in standing position

Permanent visual privacy

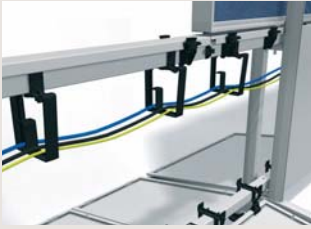

Intelligent features

The deep cable channel with its enormous capacity supports neat cable management, such as the cable bag for cable slack and cable brackets. The cable channel is accessible from both sides, without the need for tools. It also supports connectivity at any point you choose. Even with junctions, a single base or

an entrance from the top rail is enough, as FreeWall supports concealed, horizontal interconnecting wiring through several FreeWalls linked together. An optional e-box built into the monitor shelf provides each user with quick and simple power and IT connectivity.

Tailored to suit **your** taste

Design your workspace to suit your own taste. With its multiple colors and materials, FreeWall blends harmoniously into any environment. It can also be used as an acoustic

component.

A word about usage: FreeWall panels are very simple to replace if you wish to change colors or function.
